```
                                    PROCEEDINGS
(Atlanta, Fulton County, Georgia; January 26, 2024.)
THE COURT: Have a seat, please.
Just as a wrap-up to Mr. Adida's testimony, I know
that there were objections at the outset of his testimony regarding the -- from the plaintiffs regarding the failure of the government -- of the State to have supplemented its disclosures regarding Dr. Adida's testimony under \(26(e)\) with -specifically with respect to matters that he addressed beyond his -- the affidavits he had provided in -- for two affidavits in 2020.
```

And those pose some -- do pose some concerns given the scope of some additional matters that he addressed particularly in '22 and thereafter. But I think it is more important at this juncture that $I$ just continue to proceed in hearing testimony. It was -- I proceeded with the notion -with the understanding that that was the request, that it would just be conditionally admissible, and I will look at this more specifically and any issues that are caused by that.

So I just wanted to make that clear.
And at the same time, I think I did allow plaintiffs a very full opportunity to cross-examine Dr. Adida. I think it is unfortunate that some of the additional materials he was relying on weren't provided as far as I understand.

MR. MILLER: Your Honor, if I may. I think that --
you know, we obviously had a typical objection with an expert at the outset of the testimony at the point of tendering.

I -- frankly, $I$ don't recall drawing an objection of exceeding the scope on my direct examination. What ended up happening is on cross-examination the plaintiffs determined to elicit plenty of testimony that is beyond, you know, what they didn't want me to talk about.

That is perfectly fine. And something Your Honor noted yesterday when I got up for my redirect -- or I think at one point I had objected, and you made the note, you're welcome to explore this on redirect.

So with that note, I'll note that.
Secondarily, with respect to timeline of, you know, 2022, 2023, you know, Dr. Adida is a hybrid fact witness as well because he is obviously -- as he testified he is assisting with the State on implementing the audits. You know, so that testimony is factual testimony to that extent. And so I'll just make that note.

And, Your Honor, too, we discussed yesterday the issue with the Tweets. And I will bring these up. We just had it printed out today.

THE COURT: Before we deal with the Tweets, let me just say this. I agree with you there are -- there are subject matters that the plaintiffs brought up in cross-examination that you then were allowed to address. But there were -- the
whole -- but there were a number of matters still that came up during his direct examination regarding what he did in ' 22 .

And he also relied on -- let me just say this: This is why I'm delaying it, just to be very precise. I need to go back and read everything in the course of it. There seemed to be new matters that should have been disclosed that were not just fact matters.

And it is a delicate assessment that can't be done right this moment. But $I$ just wanted to sort of flag it because it requires me to really look at the record again.

MR. MILLER: Your Honor, of course, I'll note the time that we've spent on the other matter relative to a sealed proceeding that had to do with Rule 26 disclosures that we did on extremely short notice under an extremely difficult protocol that we're still talking about for some reason.

But, nonetheless, Your Honor, that -- you know, it creates a bit of a circular issue. That is the last I'll say on that topic.

THE COURT: Fine.
MR. MILLER: But we did move for completeness as to these Tweet threads.

THE COURT: All right.
MR. MILLER: We printed it out. I just hand them up here. The Court can consider it --

MR. CROSS: Your Honor, we object to this.

MR. MILLER: -- for whatever the Court considers it's worth.

MR. CROSS: The Tweets are not in evidence. If he wanted to put them in evidence, he had to do it with the witness on the stand.

MR. MILLER: And, Your Honor, the issue there is that with the Tweets -- if the Tweets were not in evidence, they were on the screens for probably about 30 or 45 minutes while we were sitting here continuing this cross-examination.

You know, if the Court is considering it because it has been placed into the Court's view, you know, that becomes the issue. I know that is a small font. We can provide it electronically. It is a little easier to read. But we just want to make sure that the complete thread is with Your Honor.

And I think -- as I recall, I believe that there was an agreement that Mr. Cross was fine with putting in the complete issue before -- or the complete thread before Your Honor.

MR. CROSS: If Your Honor --
MR. MILLER: Whether it is substantive evidence or not, I'm providing it to the Court.

Thank you.
MR. CROSS: Your Honor, if you want to read the Tweets, read the Tweets. This is such a sideshow. They had an opportunity with a witness on the stand to introduce it as an
exhibit. They didn't. The rules of evidence matter. You can't show up the next day and say we suddenly have a new document that the witness hasn't authenticated and no one has seen. But if you want to read it, read it.

THE COURT: Well, you are not going to actually dispute it. I mean --

MR. CROSS: It is totally irrelevant. But have at it. It's fine. I don't know why we are even doing this. The last thing $I$ just want to say is this. We didn't sleep last night, and we are -- I am physically ill about what we talked about this morning. And I don't want to hear any more attacks on us like we somehow have created a distraction. I don't want to hear it anymore.

THE COURT: I want to say this. I'll take the -this under advisement. I'll think about it, what was just proffered. I'm not sure that the whole course of testimony doesn't come out, but -- as it is. But we've got to return to getting down to business with the next witness.

I don't doubt your -- I mean, everybody in this room is exhausted as it is. And this case has raised a lot of emotions among many people involved as well.

And perhaps my efforts to be light at times and even to sing to you or tell you stories is an effort to try to bring down the temperature. Unfortunately, I don't know many lyrics to many songs.

MR. BELINFANTE: We can help, Your Honor.
THE COURT: But you might get me to that point.
But everyone has to survive this. It is a serious
case that people feel passionately about. And people feel passionately in the state that they have tried to do what is in the public interest, and that is what the plaintiffs view that as -- that they are trying to function in the public interest.

We're at a time in our country where there is great divisions. And so while everyone has to be a good advocate here, we've got to keep some perspective about this. And I know that at various points one person or another feels that their integrity has been challenged.

And inevitably that happens during the course of heated litigation. But I truly encourage everyone to keep the temperature down because we've got more to go. And you probably don't want me singing in the middle of your objections. But $I$ could do it. I could do it.

So I have sympathy for all of you. I have sympathy for my husband too and for your families. I mean, this is hard. But let's just try our best to keep the temperature down as much as possible, even if you're going to be a strong advocate and not get too personal, because it just is going to make this unbearable.

All right. So Mr. Evans is here; right? And we're going to begin with him -- is that right? -- again?

Thank you.
MR. MILLER: Yes, Your Honor. We're intending today to have Mr. Evans, along with Mr. Kirk and Mr. Davis. That order I anticipate might be the other way around. But it is just depending on both of their availability this afternoon.

THE COURT: Of course, I don't have my notes to tell
me where you stopped. But could you remind me.
MR. MILLER: Your Honor, with Mr. Evans we stopped, I think, at the conclusion of Mr. Cross' cross-examination, and I believe Mr. McGuire might have some noncumulative cross-examination as well.

THE DEFENDANTS' CASE (Continued).
THE COURT: All right.
Good morning, Mr. Evans. Remember that you are still under oath.

MR. McGUIRE: And, Your Honor, we took your
admonition yesterday to heart and tried to cut this down. So it may be a little shorter than I anticipated yesterday.

THE COURT: Very good.
Whereupon,
BLAKE EVANS,
after having been previously duly sworn, testified as follows:
CROSS-EXAMINATION

BY MR. MCGUIRE:
Q. Mr. Evans, good morning.
A. Good morning.
Q. My name is Robert McGuire, and I represent Coalition for Good Governance, which is one of the plaintiffs in the lawsuit.

Mr. Evans, the State manages and publishes reporting of early voting on the Secretary's website during federal and state elections, doesn't it?
A. Yes. I believe what you are referring to is the absentee voter file report.
Q. And the State also manages and publishes reporting of mail ballot voting daily on the website during those elections?
A. Yes.
Q. The State runs a central portal for absentee ballot applications?
A. Yes.
Q. The Secretary of State's office creates the data used on electronic pollbooks?
A. So we manage the voter registration database that is GARViS. The counties maintain the data within that database. Q. Does the Secretary's office still send printed backups of the electronic pollbooks to the counties?
A. Yes.
Q. Switching gears a bit, municipal elections happen every two years in Georgia; right?
A. Generally, yes.
Q. And based on your understanding and experience, Georgia law does not dictate how municipalities have to run their election, does it?
A. That's correct.
Q. So Georgia municipalities can choose to use hand-marked paper ballots or BMDs when they run their own elections?
A. They can.
Q. And municipalities that run elections using hand-marked paper ballots can choose either to do a hand count or to use scanners to tabulate the votes; right?
A. They can.
Q. Municipalities that want to use scanners may borrow scanners from their county?
A. They can enter into an IGA to do that.
Q. And that is the same for municipalities that want to use BMDs; right?
A. Correct.
Q. The State doesn't retain records of what pieces of election equipment get borrowed by municipalities, does it?
A. We would not necessarily receive a copy of that IGA; correct.
Q. Are you aware that in 202311 municipalities in Gwinnett County ran their own municipal elections using hand-marked paper ballots?
A. That does sound correct.
Q. Are you aware that one of those 2023 Gwinnett County hand-marked paper ballot municipal elections was held in Peachtree Corners?
A. That sounds correct.
Q. Are you aware that another one was held in Snellville?
A. Sounds correct.
Q. Peachtree Corners has over 42,000 residents; right?
A. That sounds accurate.
Q. And that is bigger than the population of 110 Georgia counties?
A. That would not surprise me.
Q. And Snellville has over 21,000 residents?
A. That sounds accurate.
Q. Mr. Evans, you said you were the election coordinator in Escambia County, Florida, until April of 2019?
A. That became my title, and then $I$ was until right around the beginning of April 2019.
Q. And I believe you testified Escambia County used hand-marked paper ballots cast into scanners for in-person voting?
A. Correct.
Q. And did Escambia County have Florida's equivalent of what in Georgia is early in-person voting?
A. There was early in-person voting.
Q. And Escambia County operated vote centers for early voting just like we have here in Georgia; right?
A. Where anybody can go to any location in their county; correct.
Q. So those vote centers in Escambia County had to stock ballot styles for the whole county?
A. The technology that we used for early voting locations there was Ballot on Demand printing.
Q. So you would print out ballot styles as they were needed?
A. Correct.
Q. And what is the population or what was the population of Escambia County when you were there?
A. I believe there were right around 215,000 voters registered.
Q. Lastly, you testified previously that you prefer ballot-marking devices over hand-marked paper ballots because you don't have as many mismarks and you think that on a BMD it is very obvious to tell what vote intent was.

Do you recall that?
A. Yes.
Q. Now, when in-person voters make overvotes on a hand-marked paper ballot, the Dominion scanners at in-person voting poling places are currently programmed to catch and kick back ballots with overvotes; right?
A. I forget if it automatically kicks it back or if it stops
and asks the voter if they want to cast it. But there -- it will -- it would -- there would be something there where the voter could either choose to cast it or review it.
Q. So the voter has a chance to correct that?
A. Correct.
Q. And that is when they are voting in person versus voting absentee?
A. Correct.
Q. Do ambiguous marks also cause the scanner to give the voter a chance to correct the ballot?
A. If it is something that is in the oval that is an ambiguous mark, then there is a possibility that the scanner would catch that ambiguous mark and reject the ballot.
Q. And that would be the same for I guess what you would call stray marks?
A. It depends if it is -- if it is in the area where the oval is where the scanner is looking, then it could very well kick the ballot back.
Q. Okay.

MR. McGUIRE: Thank you. I have nothing further,
Your Honor.
Thank you, sir.
CROSS-EXAMINATION

BY MR. OLES:
Q. Good morning, Mr. Evans.
A. Good morning.
Q. Now, do you recall yesterday when you were here last on this stand you said -- you were asked and I believe that you stated that you had no personal knowledge of any votes not counted as cast?
A. Correct.
Q. Okay. Are you -- but you are aware at least that in the 2022 DeKalb County District 2 primary the Dominion voting system returned the wrong winner in that race; correct?
A. I am aware of the event that you're referring to.
Q. Okay. And you are aware that Coffee County, in the 2020 election, that the board voted unanimously to certify the hand count audit instead of the Dominion voting system count because of problems they were reporting with the vote counts?
A. If I remember correctly in Coffee County -- and I would have to double-check -- I believe their hand audit of the presidential results exactly matched the machine count.
Q. So you don't recall, but you do recall that they were reporting problems?
A. I recall them contacting us with issues they were having. Q. Thank you.

And you are aware that Governor Kemp referred to the State Election Board a 36-point study of discrepancies found in the November 14th Fulton County 2020 hand count audit?

MR. BELINFANTE: Object to the question as just
mischaracterizes what I think the -- I think what he is talking about is not a study. And I think he can certainly ask the question. I just didn't want it to be deemed some form of academic study was the basis of the objection.

THE COURT: All right. So noted.
And would you agree it wasn't a study?
MR. OLES: It was a letter, yes, Your Honor.
THE COURT: It was a letter. Okay.
THE WITNESS: I remember the letter.
BY MR. OLES:
Q. Thank you.

So, in fact, there were reports coming in -- despite your
lack of personal knowledge, you are aware that there were reports coming in that there were problems with the counts?
A. I remember the letter referring to the hand count. And I remember the instances in Coffee County where they were having some technical difficulties.
Q. Okay. And you are also aware, are you not, that in the 2021 U.S. Senate race that it was reported that there was a 20,000 vote reversal, that is reduction, of counted votes for one of the senate candidates?
A. Can you elaborate a little bit?
Q. Yes. In the -- excuse me.

In the 2021 U.S. Senate race for Herschel Walker, there was actually a point in this period of four minutes where his
vote count was reduced by approximately 20,000 votes.
Do you recall that?
THE COURT: Are we talking about the 2020 or 2022 ?
MR. OLES: That is -- I'm sorry. 2022. I misspoke.
THE COURT: Okay.
THE WITNESS: I think likely -- I think I remember
what you are referring to. And I think it was a county uploading an old results file to the election night results reporting page.

BY MR. OLES:
Q. But you do recall that in the middle of the election that there was being reported a 20,000 vote drop?
A. I remember hearing a report of that.
Q. Okay. And isn't it true that the media that reported that gets its feed from the same election feed that the Secretary of State gets?

In other words, they both get a feed from Clarity?
A. I am not sure how the media outlet gets its feed.
Q. Now, do you also recall when you were last on the stand that you testified to the effect that vote dilution is when unlawful ballots dilute lawful ballots?
A. Yes.
Q. Okay. Would you agree with my statement that when there are duplicate votes counted, that is the same ballot or ballots may be counted two or more times, that would have the effect of
diluting other lawful votes?
A. Yes.
Q. And you said that you are not aware of any possible cases of vote dilution in Georgia?
A. No. I can think of instances where there has been multiple of the same ballot scanned or something, you know, some form of very limited voter fraud.
Q. Okay. And you are aware of an active complaint before the State Election Board Number 2023-025 which purports to provide evidence of 3,125 duplicate ballots being included in the certified 2020 Fulton County results?
A. I remember hearing about the case.
Q. And you are also aware of an active lawsuit under the name of Favorito v. Wan where four senior poll managers and two audit monitors alleged that they found hundreds of duplicate counterfeit mail-in ballots in the November 14, 2020, Fulton County hand count audit?
A. You are asking if I'm aware of the case?
Q. Yes.
A. Yes.
Q. Okay. And, in fact, the Secretary of State, that is your office, filed an amicus brief in the lawsuit in that case attempting to prevent the plaintiffs from inspecting the ballots to determine how many counterfeit ballots may have included in the election results?

You are aware that your own office filed that?
A. I'm generally aware.
Q. Okay. So is it fair to say that even though you may not have personal knowledge, as you claim, there are plenty of instances out there where it may turn out that there actually were problems in the counts?
A. I'm aware that people have alleged that there are problems with the counts and some of those are being investigated.
Q. Okay. Thank you.

MR. OLES: Nothing further, Judge.
REDIRECT EXAMINATION
BY MR. BELINFANTE:
Q. Hello, Director. Good to see you again.
A. Good morning.
Q. Let's start where we left off, if I can get there.

THE COURT: That would be helpful to me to find out
where we left off. That's what I --
MR. BELINFANTE: And I'm sorry. When I say left off,
I meant where -- just today. I'll get into the larger one. BY MR. BELINFANTE:
Q. So we'll start with the questions that were asked to you by the Coalition counsel.

You were asked about printed backups for the poll to identify individuals who are registered to vote.

Do you recall that?
A. I do.
Q. When are those sent to the counties -- the printed backups?
A. We'll generally begin sending files to the printers for the printed electors list around two weeks in advance. And then within 24 or 48 hours of election day, sometimes 72 hours, we'll send an electronic copy of what is called an emergency list, which is an updated list that includes credit for people who have voted during advanced vote period, and then it is the county's choice to determine which of those lists to use.
Q. Okay. So why would you send a list that shows people who voted during early before -- I'm sorry, who voted early advanced voting after something was sent to the printer?
A. Because we want to send counties a printed copy that they are able to use, but then we also want them to have the electronic list so if they so choose they can print that out or if they want to supply it in Excel file format for their poll workers they have the option to do that. And it is a list that shows people that have shown up to vote.
Q. So it is up to the county to then use the updated list?

Is that what I understand you to say?
A. Yes. They have the resources, and they can use them.
Q. Okay. For the record, too, you talked about an IGA, when looking at municipal elections. I don't think you ever defined what an IGA is.

Can you just do that for the record?
A. An IGA is an intergovernmental agreement between the two parties.
Q. Okay. You were asked about municipal elections and whether municipalities do hand count or scanner.

Do you recall that?
A. I do.
Q. Okay. Do you know which municipalities in Georgia use hand counts for election results?
A. I don't have the list.
Q. Okay. In your experience, have you found hand counts to be more or less accurate than electronic scanned results?
A. In my experience, generally the machine count is more accurate.
Q. You were also asked about elections. I'll just pick on Peachtree Corners because I think that was the largest of the municipalities you were asked about being identified.

Can you tell the Court just in a general sense when comparing the size of a municipal ballot from municipal election, odd year, Peachtree Corners for example, to that of a statewide general election, is there typically a difference in the size of the ballot?
A. Typically there would be fewer contests on a municipal ballot.
Q. Okay. Are statewide constitutional amendments made on
odd-year elections?
A. I don't recall that they are.
Q. Okay. In terms of -- you were then asked a series of questions about your experience in Escambia County, Florida.

Do you know roughly how many precincts -- voting precincts, were in Escambia County, Florida, on election day?
A. I believe it was low 70s.
Q. Okay. Do you know roughly how many precincts are in Fulton County on election day?
A. Between 200, 250, somewhere in there.
Q. All right. Comparatively, in your experience -- and let's just focus on Fulton County versus Escambia County -- who had longer ballots?
A. Fulton County.
Q. You were also asked about -- a series of questions about if a voter using a hand-marked paper ballot were to have an ambiguous ballot for whatever reason, erasure marks, et cetera.

If there were a ballot -- and I'll give you this. Let's say they tried to vote for one person, changed their mind, erased it, and the scanner did not kick it out. Or let's not even use a scanner. And it were hand counted, how does a polling officer determine the intent of the voter in a situation like that where you have two marks, one may be stronger than the other?

How is -- what is -- the basis of making that
determination?
THE COURT: I think you've got an objection there.
BY MR. BELINFANTE:
Q. -- in Georgia?

MR. BELINFANTE: I'm sorry.
MR. CROSS: Your Honor, object to speculation. One, because it is hypothetical; and, two, because he's asking how a poll worker makes a decision. He can't speak to that.

MR. BELINFANTE: That's fair.
I'll withdraw the question.
BY MR. BELINFANTE:
Q. If there is an ambiguous hand-marked paper ballot in Georgia, who determines what the voter intent is?
A. It would go to a voter review panel.
Q. A voter review panel?
A. Yes.
Q. Okay. And who makes up the voter review panels?
A. I believe it is a member appointed by or a member selected from the Republican party, from the Democratic party, and then also a third person that $I$ don't have in my head right now.
Q. Okay. Fair enough.

THE COURT: Is it somebody from the -- from the elections office in the county?

THE WITNESS: I would have to double-check the code.
THE COURT: Okay.

BY MR. BELINFANTE:
Q. And are there guidelines for how those individuals on the review panel are supposed to determine voter intent?

And just to be clear, too, we're still talking about that hand-marked paper ballot.
A. Sure. When you say guidelines, you mean like a --
Q. Rule, law, anything. Or are they just -- on what is the voter review panel supposed to base its decision when trying to determine what is voter intent?
A. They are trying to determine, to the best of their ability, what the voter selected. I'm not recalling any particular guides on how to do that.
Q. All right. You were asked about a letter that Governor

Kemp referred to, I believe, the State Election Board.
Do you recall that? Mr. Oles asked you about that.
A. I do.
Q. Do you know who wrote the letter?
A. I do not recall.
Q. You were also asked about what was described as an undercount for Candidate Walker in the 2021 Senate race.

What was your understanding of what was the reason for that undercount, if there was one?
A. So typically when that happens, there have been cases where counties, on election night, or in the days following -they have to upload to our election night results tool, which,
just to clarify, you have the election management system which is not connected to the internet which tabulates the results. And then you have a file that comes out of that.

And then that file is taken to a computer. That is how we are able to broadcast results to the world. And that file is uploaded into election night results reporting by county election officials.

When that file is uploaded, counties can publish their county level results and then we at the State aggregate everything.

And so what we have seen in the past is if a county -they have uploaded a result file and then they come back a few minutes later and they accidentally upload a results file that was earlier than that, it causes their results to lower.

And so that is -- if, in fact, there was a drop in the election night results reporting tool, that is initially would be what I have seen cause that.
Q. Okay. Do you know if the State certified the reelection of Senator Warnock in that 2021 United States Senate race?
A. The results were certified, yes.
Q. Do you know the -- you were asked about a case where the Secretary's office filed an amicus ballot.

Do you recall that?
THE COURT: An amicus ballot?
MR. BELINFANTE: I'm sorry. Cross streams.

BY MR. BELINFANTE:
Q. An amicus brief.

Do you recall that question?
MR. BELINFANTE: Thank you, Judge.
THE COURT: That is all right. It was a new one to me.

MR. BELINFANTE: Despite all the accusations, we don't file amicus ballots.

THE COURT: Well, people do think they are. BY MR. BELINFANTE:
Q. Do you recall being asked about whether -- a case where the Secretary filed an amicus brief?
A. I do.
Q. Do you know the status of that case today?
A. I don't recall.
Q. Okay. All right. You were asked, I believe -- well, yeah, I know you were -- about the SAFE Commission during Mr. Cross' cross-examination of you.

Were you a member of the SAFE Commission?
A. I was not.
Q. Did you provide any testimony to the SAFE Commission?
A. I did not.
Q. Were you a member of any subcommittee of the SAFE

Commission?
A. I was not.
Q. How -- and then you were asked a series of questions about the State of Florida and your experience in Escambia County.

How were the hand-marked paper ballots tabulated in
Escambia County?
A. With machine scanners.
Q. You were also asked about whether the current BMDs could be, quote, hacked with a pen.

Do you recall that?
A. I recall.
Q. All right. Let's take a look at the poll worker manual.

Do you have a -- we'll pull up a copy or an image up here.
MR. BELINFANTE: It is Defendants' Exhibit 1242. I'm
not sure if we have a hard copy for you.
THE WITNESS: I think I have one up here.
BY MR. BELINFANTE:
Q. Oh, you do have one up there?

You had testified earlier that managers are required --
and you can turn to Page 14 where it discusses it. Poll
managers are required to take an oath.
Do you recall that testimony?
A. I do.
Q. All right. I don't know how clear we can get it. But do you see where it has the oath of the managers at the top left?
A. I do.
Q. All right.

THE COURT: Just one second. It looks like everyone has this on their screen but me.

COURTROOM DEPUTY CLERK: I don't have it either.
Just one second.
(There was a brief pause in the proceedings.)
THE WITNESS: I do have a hard copy. It is a little small, but ...

BY MR. BELINFANTE:
Q. All right. The oath of the managers there, do you see that there?
A. I do.
Q. Okay. And is this a requirement in order for someone to be an actual manager?
A. It is.
Q. Okay. Could we -- and election supervisors are -- excuse me, superintendents are trained on this; correct?
A. Yes.
Q. Let's pull up a demonstrative, which is just a statute from the code books, Code Section 21-2-94. It looks like this is the statute addressing the oath.

Would you agree with that?
A. So I cannot see it.
Q. Oh, you don't have it on the screen?

THE COURT: Just one moment.
(There was a brief pause in the proceedings.)

BY MR. BELINFANTE:
Q. Does that look like what the oath is required of managers? COURTROOM DEPUTY CLERK: He still doesn't have it.

MR. BELINFANTE: I'm sorry.
THE COURT: Try the patience of the manager of the courtroom. Just a second.
(There was a brief pause in the proceedings.)
MR. BELINFANTE: What we could do, Your Honor --
THE COURT: Why don't you read it to him?
MR. BELINFANTE: What's that? I'm sorry.
THE COURT: Do you want to read it to him?
MR. BELINFANTE: I could do that, but what I --
THE COURT: Looks like you have got a --
MR. BELINFANTE: We have a code book. Or what I
could do, because I wasn't intending to introduce the statutes as exhibits, but we can print them out at a break and I can move on to different questions --

THE COURT: Okay.
MR. BELINFANTE: -- if that would work.
COURTROOM DEPUTY CLERK: We got it.
(There was a brief pause in the proceedings.)
BY MR. BELINFANTE:
Q. Does this, to your understanding, reflect the oath that the managers must take?
A. Yes.
Q. Do you see there three lines up from the bottom where a poll manager has to swear under oath that they will use my best endeavors to prevent any fraud, deceit, or abuse in carrying on the same?
A. Yes.
Q. If someone were to try to manipulate a ballot-marking device with a pen or anything else, would that -- is it your understanding that that would constitute fraud, deceit, or abuse?
A. Yes.
Q. And if a poll manager, is it your understanding, were to see that happening and allow it to happen, would they be in violation, of their oath?
A. Yes.
Q. How about the --

MR. BELINFANTE: If we could go back to the
Defendants' Exhibit 1242, the poll worker manual, Page 14 again. I think this one is a little clearer because the font is bigger.

Can we look at the oath of clerks?
BY MR. BELINFANTE:
Q. What is a polling clerk?
A. So a polling clerk are poll workers that work under the supervision of the manager and the assistant managers.
Q. Okay. Do they -- they have to -- do they have to complete
an oath as well in order to serve on -- as a clerk?
A. They do.
Q. Okay. And do you see the same language there about preventing fraud, deceit, or abuse?
A. I do.
Q. Okay. And any reason that if a clerk saw someone manipulating a ballot-marking device that it would -- is it your understanding that that would also violate their oath that they have sworn to in order to conduct their job?
A. If they did not intervene, then yes, it would be a violation.
Q. Okay. What are poll officers?
A. Can you provide the context?
Q. Sure. Why don't we look at the poll worker manual again, Page 4. I think you were asked a series of questions -- you may have been -- about this.

That first statute 21-2-92(a) says poll officers.
Do you know what that refers to?
A. Poll workers.
Q. Okay. And what are their qualifications, just looking at this first line, that a poll worker has to satisfy in order to become a poll worker?
A. So according to the statute, they shall be judicious, intelligent, and upright citizens of the United States. And then it goes on from there.
Q. That is fine for now.

Do poll workers need to receive any type of certification
to serve as a poll worker?
A. They need to undergo training.
Q. Okay.

MR. BELINFANTE: Actually, if you could take that down, and if we could look at the bottom, 21-2-99(b) there. Yeah. BY MR. BELINFANTE:
Q. What does that first sentence say there or up to the semicolon at least?
A. No poll officer or poll worker shall serve in any primary or election unless he or she shall have received instruction as described in Subsection (a) of this code section.
Q. Okay. Are election superintendents -- moving on from this --

MR. BELINFANTE: We can take that down.
BY MR. BELINFANTE:
Q. Are election superintendents trained on issues involving cybersecurity, to your knowledge?
A. Yes.
Q. Okay. Does that include any kind of training about the physical security of a ballot-marking device?
A. There is cybersecurity training and also physical security training.
Q. So do you distinguish between physical security and cybersecurity?
A. Yes.
Q. Okay. Can you explain just briefly what differences you see between those?
A. So before anybody --

MR. CROSS: Your Honor, I just object. This is beyond the scope. We didn't ask him any questions about the cybersecurity training for anyone.

MR. BELINFANTE: Your Honor, they did ask about Dr. Halderman's report. They asked him about Wenke Lee and whether he knew about ATI, I think it is called, the malware that is so secretive it-deletes-itself-and-can't-find-it stuff. They asked -- let's see if I can find more.

THE COURT: Does that deal with training on -- that is all -- none of that really deals with training issues, if I heard you correctly, or the questions.

MR. BELINFANTE: It doesn't deal with training. But it does deal with the -- what the State does in terms of addressing the issues that there was cross-examination about. There were questions about Dominion and its cybersecurity efforts.

THE COURT: Yeah. I just -- but you -- I guess it is rather confusing because you started this set of questions because you were asking, are election superintendents -- moving

```
on from this --
    We can take this down.
    And are election superintendents trained on issues
involving cybersecurity to your knowledge?
    And then he says yes.
    Then you say, does that include any kind of training
about the physical security of a ballot-marking device?
    The answer, there is cybersecurity training and also
physical security training.
    And then you asked, do you distinguish between them?
    But I don't know how -- what -- referring to Wenke
Lee, how that really --
    MR. BELINFANTE: I think it --
    THE COURT: It may be there are issues arising from
Dr. Halderman's report.
    MR. BELINFANTE: Let me try it this way, Your Honor.
    THE COURT: It is not that there is something -- I
just think you need to -- it is not clear how you are setting
this up.
    MR. BELINFANTE: Sure.
            THE COURT: So if you want to just ask about the
training and the difference between those trainings and who
delivers the training, that is what you were asking about, as I
understand it. But suddenly we're into Dr. Halderman's report
and Wenke Lee when you have been asking about training.
```

MR. BELINFANTE: I think it all comes back to the question of whether someone could use a ball point pen in the back of a machine. He is testifying about training that is on cybersecurity.

He drew a line between cybersecurity and physical security. So that is why the question at issue is what is the difference.

THE COURT: All right. That is fine. Ask that question then. But it seemed like you were going in five directions at once, and it was unclear.

MR. BELINFANTE: I think you have probably helped me clear it up some too. BY MR. BELINFANTE:
Q. So can you just explain to the Court when you say there is a difference between cybersecurity and physical security what you mean by that?
A. So when we talk to election superintendents specifically about cybersecurity, generally what we are referring to is that in order to -- for anybody to get access to the voter registration system, so anybody in their office, the election superintendent or otherwise, they have to undergo cybersecurity training.

Separate from that when we talk about physical security of the ballot-marking devices, that is where we get into seals, the State Election Board rules about limiting access, and that
sort of thing.
Q. All right. Do you know if Georgia has a policy whether in
statute or rule or anything else that makes it -- that makes it
unlawful or otherwise wrong for someone to open and/or tamper
with a ballot-marking device without authority?
A. Yes.
Q. Okay.

MR. BELINFANTE: Can you pull up, just as a
demonstrative please, Code Section 21-2-580?
MR. CROSS: Your Honor, we'll stipulate that it is
illegal to do this.
MR. BELINFANTE: Okay. We can probably move through a fair amount of these then.

In fact, if the Court will give me all of maybe two minutes, I could probably shorten this by 10 or 15.

THE COURT: All right.
MR. BELINFANTE: If I can just confer with
plaintiffs' counsel real quick and maybe offer some stipulations.

THE COURT: All right. Fine.
MR. BELINFANTE: Thank you.
(A discussion ensued off the record.)
MR. BELINFANTE: Thank you, Your Honor.
I think I can -- this has shortened it to some
extent. I think the parties agree -- and certainly I'm sure I
will be corrected, and invite that if I am wrong -- that Georgia law in Code Section 21-2-581 prohibits the unauthorized possession of voting machine keys.

That Georgia law in Code Section 21-2-582 makes it
illegal for persons to tamper with or damage BMDs or tabulators.

That Code Section 21-2-582.1 makes it illegal to alter, modify, or change any aspect of voting equipment without the prior approval of the Secretary of State.

Is that acceptable?
MR. CROSS: Your Honor, we haven't studied these
statutes, but I take as a given that Mr. Belinfante has them accurately.

What I would say is, Your Honor can take judicial
notice of any statute and interpret it. I don't have any reason to think what he said is wrong.

MR. OLES: We concur.
MR. McGUIRE: We also do.
THE COURT: All right.
BY MR. BELINFANTE:
Q. Mr. Evans, is it your understanding, based on the stipulation that you just heard me describe, that if someone were to use a pen or any other device and open the back of a BMD machine that that could be unlawful?
A. Yes.
Q. I think Mr. Cross had asked you --

MR. BELINFANTE: And if we could pull up on
Defendants' Exhibit 1242, the poll worker manual, Page 7. BY MR. BELINFANTE:
Q. You were asked a series of questions about this Code Section 21-2-267. Do you recall that? And it was dealing with privacy of voters and so on.
A. Yes.
Q. All right. You were asked, as I recall, about certainly the first sentence which talks about a curtain, screen, or door in the upper part of each compartment or booth so that in the marking thereof, they, meaning a voter, may be screened from the observation of others.

Do you see that first sentence?
A. I do.
Q. Okay. Can you just read the second sentence that follows that?
A. A curtain, screen, or door shall not be required.

However, for the self-contained units used as voting booths in which direct recording DRE voting units or electronic ballot markers are located if such booths have been designed so as to ensure the privacy of the elector.
Q. Okay. Given that code section, to your knowledge, are there counties that allow a voter to completely enclose themselves off from view when voting on a ballot-marking
device?
A. To my knowledge, no county does that.
Q. Okay. In fact, if you read the next -- go ahead and read the next sentence.
A. When practicable, every polling place shall consist of a single room, every part of which is within the unobstructed view of those present therein, and shall be furnished with a guardrail or barrier closing the inner portion of such room, which guardrail or barrier --

THE COURT: I think you're going to have to go a little slower. Okay.

THE WITNESS: Apologies.
When practicable, every polling place shall consist of a single room, every part of which is within the unobstructed view of those present therein, and shall be furnished with a guardrail or barrier closing the inner portion of such room, which guardrail or barrier shall be so
constructed and placed that only such persons as are inside such rail or barrier can approach within six feet of the ballot box and voting compartments or booths or voting machines as the case may be.

BY MR. BELINFANTE:
Q. In terms of the unobstructed view, who is supposed to have the unobstructed view, to your understanding?
A. The -- those present therein.
Q. Okay. And what is the significance of the six feet barrier there?
A. To allow the voter privacy.
Q. Okay. And so is it -- and just to -- because we were -you were asked a series of questions about what it looks like when people vote.

Is it -- to your knowledge, is it you have to be measured at six feet from the edge of the BMD?
A. According to the code, somebody cannot get within six feet to avoid infringing upon privacy.
Q. But someone could be at six-foot, two inches and be consistent, is your understanding, with the law?
A. It would not violate this law.
Q. Okay. The -- you were also shown --

THE COURT: Could you just -- while we are on the
topic, because -- could you explain what -- what this really means in practice or if you have actually any information as to that when the first sentence says that the booth in -- the self-contained units used as voting booths in which DRE voting units or electronic ballots are located need to be designed so as to ensure the privacy of the elector.

Just talk to me a little bit about what that means, designed to ensure the privacy of the elector.

THE WITNESS: So the privacy of the voter has to be maintained. So my personal understanding and opinion of this
is that some of this language in here is a little antiquated when it talks about, you know, curtains and different things like that. You used to see that more with older machines or older equipment.

But when you get to the six feet portion, the only people that are allowed to be within that voting area -- the true two primary groups are -- or three, poll workers, voters, and then also poll watchers.

And poll watchers are able to be within that space, but I would say even for them this would say you can't get more than -- you can't get any less than six feet or any -- you can't get closer than six feet of a voter or do anything else that would infringe upon the voter's privacy.

Does that kind of answer your question?
THE COURT: That's clear.
But I guess, do you have your own professional assessment of what it means to have the booths designed to ensure privacy of the elector or do you have any -- are there any -- is there any guidance given by -- currently by the department or by your office as to what that means?

THE WITNESS: So the way that I think about that is essentially design the room such that the voters that are standing in the check-in line to check in don't have a direct view of the screen. So you can kind of design the layout of the room such that you don't infringe upon any privacy.

I think it would also entail, you know, designing shields and that kind of thing.

THE COURT: Because it says the booths have been designed so as to ensure the privacy of the elector.

THE WITNESS: Uh-huh (affirmative).
THE COURT: And is there anything you have given -that you know of where the Secretary of State's office has given guidance as to the design of the booths themselves to ensure privacy?

THE WITNESS: So with this particular equipment, we did distribute with the initial distribution of the equipment those blue screens that were shown earlier. I believe by -during the exchange with Mr. Cross. So we have those. Counties can then choose to do something different if they want. Some counties, Fulton for example, have the metal carriers that they use. But for our office we provided the blue shields.

And then there is also --
THE COURT: Those shields are where? I'm sorry. I just forgot.

THE WITNESS: They are the corrugated plastic -- the blue corrugated plastic that goes around the machines.

MR. CROSS: Your Honor, just to help, if you flip to Page 61 of Exhibit 1242, you can see a picture of that. It is one of the things he looked at in my examination, if you have
the document.
THE COURT: All right. Is that it right now that is on the screen?

THE WITNESS: Yes. That's right.
THE COURT: And the blue is -- oh, I see, the outer
shield.
THE WITNESS: Correct.
THE COURT: All right.
Thank you.
BY MR. BELINFANTE:
Q. Just to that point, can you read the last sentence of 21-2-267(a), which is on Page 7 of the poll worker manual?
A. In the case of direct reporting electronic, DRE, voting units or electronic ballot markers, the devices shall be arranged in such a manner as to ensure the privacy of the elector while voting on such devices to allow monitoring of the devices by the poll officers while the polls are open and to permit the public to observe the voting without affecting the privacy of the electors as they vote.
Q. Okay. And just for clarity again, when it says direct recording electronic voting units or electronic ballot markers, is the current Dominion equipment an electronic ballot marker?
A. Correct.
Q. Okay. Let's go back to -- I think Mr. Cross pointed out Page 61 of the poll worker manual.

If a voter is standing in front of this device -- well, first off, this is a ballot-marking device; is that correct?
A. Correct.
Q. Okay. And is this one that is used currently in Georgia that is the subject of this litigation?
A. Correct.
Q. Okay. And a voter could be standing in front of the ballot-marking device, correct, to exercise their -- to press the touch screen and whatnot?
A. Correct.
Q. Okay. Looking at this, could a voter be standing in front of -- and if a voter is standing in front of that ballot-marking device -- and let's presume someone of average height. I mean, we don't know how this is set up.

Would that also provide the voter privacy in terms of what their choices were while still allowing poll workers to monitor the devices?

MR. McGUIRE: Your Honor, I would object because from this picture you can't tell is there a wall right behind this. You just don't know the orientation. And I think that that context is necessary to make this question non-objectionable.

MR. CROSS: I think it also calls for a legal
conclusion, Your Honor.
THE COURT: Well, let me just -- I think that the facts -- factual description is really the more important one.

MR. BELINFANTE: Okay.
THE COURT: So if you -- I mean, you have to have the assumptions of where somebody else is standing.

MR. BELINFANTE: Sure. Understood.
THE COURT: How much room there is to be able to have
a meaningful answer to that.
MR. BELINFANTE: I'll withdraw that question and try another route. BY MR. BELINFANTE:
Q. If a voter were to be voting on that machine and standing in front of it, okay -- if someone were standing behind the voter six feet, two inches away, given your -- well, let me back up and ask this.

Have you ever been in a polling place in Georgia since the current Dominion devices have been deployed on election day?
A. I'm usually pretty busy on election day.
Q. That's a fair point.
A. I have been in early voting locations.
Q. Does the Secretary send out employees to kind of go around various polling locations?
A. Yes.
Q. Okay. And do those individuals report to you?
A. The individuals that would typically go out would be our investigators, and they report to our chief investigator Sara Koth.
Q. Okay. If an investigator doing these spot checks, I'll call them, on election day were to discover a problem and report it to the chief investigator, what happens then?
A. On many occasions, the chief -- or the chief investigator will get in contact with me or somebody in our office.
Q. Okay. All right. So --

MR. CROSS: Your Honor, I'm sorry. Could we get
clarity on what we meant by discover a problem?
MR. BELINFANTE: Sure.
BY MR. BELINFANTE:
Q. If a chief investigator -- or not chief investigator.

If an investigator found something that they deem to be potentially unlawful or just not in compliance with the code, what would that investigator do?
A. It depends on the severity of the potential violation.
Q. Can you provide us some kind of spectrum, if you will?
A. Sure. So if they see that a sign is not posted, then on many occasions they will notate that for a violation and tell the poll manager about it so they get the proper sign posted. Q. Okay. And if there was something perhaps more troublesome -- or let me ask it this way. At what point is it your understanding that information would flow to you?
A. If it were something that were impeding the ability to vote, then $I$ would find out pretty quickly.
Q. All right.

```
            Director Evans, do you recall being shown a video of your
testimony to the senate ethics committee?
A. I do.
Q. Okay. And when was that committee hearing, if you can
recall?
A. I believe it was early November of 2023.
Q. All right. Do you recall responding to a question from Senator Jones from the Augusta area during that ethics committee hearing?
A. Yes.
Q. Okay.
MR. BELINFANTE: Can we pull up the video of the ethics committee hearing starting at one hour, 22 minutes, 47 seconds into the hearing?
Go ahead.
```

(Playing of the videotape.)
MR. BELINFANTE: Pause it, please.
BY MR. BELINFANTE:
Q. Director Evans, who asked you that question?
A. One of the senators on the committee.
Q. Is that Senator Jones?
A. I believe so.
Q. Okay. Let's see what your answer was, because I think you were provided a portion of it. Let's see what your answer was. (Playing of the videotape.)

MR. BELINFANTE: Stop it, please.
BY MR. BELINFANTE:
Q. Do you agree with -- sitting here today, do you agree with what you said to the senate committee at that time?
A. As far as the things that were given, yes. I think

Mr. Cross mentioned it was in an attorney's office.
MR. BELINFANTE: Okay. We can go ahead and keep playing.
(Playing of the videotape.)
MR. BELINFANTE: Pause it, please.
BY MR. BELINFANTE:
Q. What would constitute unauthorized access as you were discussing here?
A. Somebody breaking into the room where the election management server is would be an example.

MR. CROSS: Your Honor, I just object to the extent
we're calling for a legal conclusion.
MR. BELINFANTE: I think I said what his
understanding is. I'm happy to limit the answer to nonlegal.
Does that --
MR. CROSS: Yes.
THE COURT: All right.
BY MR. BELINFANTE:
Q. And you said that -- is it your understanding that there are laws determining what constitutes authorized access and
unauthorized access?
A. Yes.

MR. BELINFANTE: Okay. We can keep playing.
(Playing of the videotape.)
MR. BELINFANTE: We can pause it and actually take it down.

BY MR. BELINFANTE:
Q. So is it your understanding that if someone lacked authority to access the entirety of the election system that you just described, scanners, precinct scanners, BMDs, et cetera, that that -- if they lacked authority to do so, is it your understanding that would be in violation of Georgia law?
A. Yes.
Q. And I will say we have stipulated that machines and -somebody please correct me on this if I get the dates wrong -that the machines in Coffee County in particular were -- well, let me back up. Let me back up before I -- I don't even need to get into that.

You said that if someone breaks in, then the equipment can be taken and pulled out and not used.

Do you recall saying that?
A. Yes.
Q. Is it important, therefore, to know as soon as possible if and when there has been an unauthorized access?
A. Yes.
Q. Let's talk about absentee ballots. You were asked a series of questions about those. Specifically whether someone casting an absentee ballot would still have their ballot cast on a BMD because the poll worker or someone would enter the information.

Do you recall that general line of questioning?
A. Generally, yes.
Q. Okay. Is it your understanding -- well, under what circumstances would that happen where a poll worker, a county official would take an absentee hand-marked absentee ballot, use it to vote on an BMD?
A. So there are some instances where a ballot will need to be duplicated because it is -- it can't be read by the scanner for a variety of reasons.
Q. Could you just give us some examples of what those reasons might be that it can't be read by the scanner?
A. Sure. So one of the -- one of the examples, all ballots that come back from UOCAVA voters who receive their ballot electronically, those have to be duplicated.

If a ballot gets torn in the mail stream or at some point in the opening process, then that would need to be duplicated.

If there are marks on the ballot that somehow, you know, keep the ballot from being read by the scanner and marks in the timing marks, then that would be a reason why the county
election officials would need to duplicate that onto a ballot that could be readable.
Q. Okay. To your knowledge, is there any county in Georgia that adopts, as a policy, that every hand-marked paper absentee ballot will be converted, as you just described, to a BMD ballot?
A. There are counties that have chosen to use ballot-marking devices for duplication.
Q. For duplication?
A. Yes.
Q. Okay. And duplication under circumstances like you just described, is that what you are -- is that what you mean by duplication?
A. Yes.
Q. Okay. I guess I didn't ask the right question or I didn't ask it clearly.

Is it your understanding or do you have any knowledge of a county that just as a policy says every absentee ballot that comes in we're going to have someone complete it, a copy of it, on a ballot-marking device and that is what we're going to use?
A. No.
Q. Okay. Did Fulton County have that policy -- or you said you don't know of any. Never mind.

You were asked earlier about pilot elections in 2019 using hand-marked paper ballots -- municipal elections.

Do you recall that?
A. I do.
Q. Okay. And I probably shouldn't have said that.

In 2019, what type of elections were those?
A. Municipal elections.
Q. Okay. And in terms of -- did Fulton County, while you were there, work with and administer any municipal elections?
A. Yes.
Q. Okay. And did that occur while you were the, I believe it was, chief deputy director?
A. Elections chief.
Q. Elections chief.

Did that happen under your watch where Fulton County administered municipal elections?
A. Yes.
Q. Okay. Are the ballots -- can you just tell the Court -we talked about this, I think, with Escambia County.

But for Georgia, can you compare the size -- or no, we talked about that in Georgia as well. I can move on from that.

Do you have any knowledge of comments made from the Cobb County election director after the 2019 pilot project involving Cobb County?
A. I don't recall.
Q. Okay. Let's look at Curling Plaintiffs' Exhibit 605. It was in your notebook. It is the Dominion voting matter.

Do you have it up there still, the notebook? Or this one may have been a free copy -- I mean, by free, I mean free standing.

MR. CROSS: We didn't charge for it either, Josh. MR. BELINFANTE: I'm sure we will see it somewhere. THE WITNESS: I do have it.

BY MR. BELINFANTE:
Q. If you could turn to, on that exhibit, Page 27 of the document, which is about the back of the fourth page. This Bates label is State Defendants' 48159.
A. Page 27?
Q. Yes.
A. Okay.
Q. Do you recall being asked a series of questions about this document?
A. I do.
Q. All right. First, the document talks about tabulator security keys.

What is a tabulator, again, in the context of the Dominion voting equipment?
A. So in the context -- so a tabulator is the scanner essentially.
Q. Okay.
A. I believe -- I believe there are some circumstances where it might also reference a BMD. But it is primarily the -- my
understanding, the scanner.
Q. All right. And is that tabulator or scanner used to tabulate both hand-marked paper absentee ballots and BMD cast printed paper ballots?
A. Yes.
Q. Okay. You were asked about why the State does not adopt Dominion's suggestion here or recommendation of using unified security keys -- of not using unified security keys in a real election.

Do you recall that?
A. I do.
Q. Okay. Why does the State choose not to do that?

MR. CROSS: Objection, Your Honor. Foundation. It is not clear that he has any involvement in that decision. BY MR. BELINFANTE:
Q. Do you have -- as the elections director, if you wanted to have the State utilize unified tabulator security keys, would that fall under your job descriptions?
A. I would certainly be a part of the discussion.
Q. Have you -- and so would you, sitting here today, recommend that the State adopt Dominion's recommendation not to use unified security keys in a real election?
A. No.
Q. Why?

MR. BELINFANTE: You can take it down.

THE WITNESS: So my understanding is that what that would do is require a unique passcode for every tabulator. In a deployed -- in a large election in Georgia, we're looking at around 9,000 scanners in the State. And the risk of being able to make sure that passwords got from our office to the election superintendents to poll workers, who at the time of the creation of the election project, election superintendents may not even know who their poll workers are going to be yet.

That, in my opinion, is ripe for confusion and potentially the inability to be able to open the equipment on election day.

BY MR. BELINFANTE:
Q. Okay. If the State were delayed in opening equipment on election day, what would a consequence of that be, based on your experience?

MR. CROSS: Objection, Your Honor. Speculation. In fact, he said he has not even been to a precinct on election day in Georgia when he was asked.

MR. BELINFANTE: I think, Your Honor, he said he was -- because he was administering them either in Fulton County or with the State, he can testify about what would happen if a state -- well, let me ask this.

THE COURT: I think, you know, I know what you are getting at. But I think you have to -- he's got to develop a little bit more of a foundation for that because it is really
just rank opinion based on not having observed it.
Perhaps the contrary situation where he -- where there have been or his having looked or actually investigated it. So he is just saying this is my -- you know, I understand. This is his reaction as -- based on his work and his -- he doesn't want to run the risk, if $I$ understand his testimony, that people will lose the password, won't have a password.

THE WITNESS: Correct.
THE COURT: Is that right?
THE WITNESS: Correct, Your Honor.
THE COURT: But have you investigated this by chatting with any of your colleagues in other states whether they all use -- whether they use a password or whether they are -- I mean, it may not be the same situation. So you may never have talked with anyone about it.

THE WITNESS: I know what was done in Escambia
County, Florida; and then $I$ also had very limited conversation with -- I think I referenced on Wednesday the state elections director in Colorado, because it is my understanding I believe that they do encourage the use of this feature.

THE COURT: Of having separate passwords?
THE WITNESS: Correct.
THE COURT: Rather than one key?
THE WITNESS: Correct.
And the reason for that would be that they have
many -- fewer scanners because they are central scan.
When I say central scan, they don't scan ballots at precincts because they primarily vote by mail.

MR. CROSS: Your Honor, we'll just object to that as
hearsay, and Your Honor can give it whatever weight you want.
THE COURT: Well, I think --
MR. CROSS: I don't want to object to anything you
ask. That is the challenge.
THE COURT: I understand. I understand. But he is reporting what he understood to be so. And that influenced his judgment, whether it is true or not true.

MR. BELINFANTE: That would be our response for the record, Your Honor. It explains conduct. BY MR. BELINFANTE:
Q. During the summer of 2020, that is when you transitioned from Fulton County to the State; is that correct?
A. Correct.
Q. Okay. And do you recall primary election day in 2020?
A. I do.
Q. Okay. Were you at Fulton County or the State on actual primary election day in 2020?
A. Fulton County.
Q. Okay. Do you recall in Fulton County there being lines -significant lines on election day for persons to vote?
A. Yes.
Q. Do you recall if any of those lines were caused by late opening poll locations?
A. Yes.
Q. And just for the record, so significant lines -- or did polling locations open late in Fulton County in the 2020 general primary?
A. Yes.
Q. Okay. And did those same locations have long lines?
A. Many.
Q. Okay. You were in the Secretary's office after the 2020 general election. Or excuse me, after the 2020 primary.

During that time, were you -- did you -- were you aware of a lawsuit known as Anderson v. Raffensperger?
A. I've heard it. I can't tell you the content of it.
Q. Okay. If I told you that it involved the State being sued based on lines at polling places, does that ring a bell?

MR. CROSS: Your Honor, I'm not sure how this relates to the scope of cross.

THE COURT: Well, he doesn't seem to remember.
MR. BELINFANTE: That is fine. That is fine. We can
talk to others about that one.
BY MR. BELINFANTE:
Q. As elections director, though, are you concerned about having voters wait in line to vote on election day?
A. Yes. That is something we work to prevent.
Q. Okay. And as elections director, are you concerned about voters having to wait in line on in-person advanced voting election days?
A. Yes.
Q. Okay. Do you want to prevent that?
A. Yes.
Q. Okay.

MR. BELINFANTE: Your Honor, $I$ note that it is 12:05.
I'm about to get into a different line of questioning. I'm happy to continue. I just wanted to see if you wanted to break now for lunch or just keep going.

THE COURT: How long?
MR. BELINFANTE: With the witness, I would say I'm probably just over halfway done.

THE COURT: Well, why don't we get a little further? MR. BELINFANTE: Sure. Okay.

THE COURT: If you get to a resting point, then again we'll reassess.

MR. BELINFANTE: Okay.
BY MR. BELINFANTE:
Q. Do you recall being asked about VVSG 2.0?
A. I do.
Q. And for the record again, what is VVSG 2.0?
A. Voluntary voting system guidelines that the voting system testing laboratories utilize when they are reviewing equipment.
Q. All right. Do you still have the notebook up there with the case on it and then it says 5.17?
A. I do.
Q. Before you open that, who issues the voluntary voting system guidelines or VVSGs?
A. The Election Assistance Commission.
Q. Could you turn to Tab 4 of that notebook, the 5.17 notebook.
A. I'm there.
Q. Do you recall a series of questions about this document here?
A. I do.
Q. All right. And again, what is the date on that document?
A. Tuesday, January 9, 2024.
Q. Okay. So -- and then you were asked a series of questions about the second full paragraph beginning with on February 10, 2021.

Do you recall that?
A. I do.
Q. Can you read the second sentence?

THE COURT: What is -- is there a document number?
Because I am --
MR. BELINFANTE: I just confirmed it was not entered into evidence. Your Honor, I'm happy to actually enter it into evidence if that would make things easier.

THE COURT: Well, I just need to know what we're looking at, at the moment.

MR. BELINFANTE: It was in the 5.17 notebook, if the
Court has that, at Tab 4.
Do we have that that we can --
THE COURT: 5.17?
MR. BELINFANTE: Yeah. We have marked it as
Defendants' Trial Exhibit 1245. It might be easier if I -- I'm happy to admit it.

THE COURT: Is there any objection?
MR. CROSS: No, Your Honor.
THE COURT: Then go ahead and admit it.
MR. BELINFANTE: We've got it marked. It is 1245.
BY MR. BELINFANTE:
Q. Can you read that second sentence there from Defendants' Trial Exhibit 1245?
A. Second sentence, second paragraph?
Q. Yes. Yes. Thank you.
A. In November and December of 2022, the VVSG 2.0 was fully ready to be used for testing with the accreditation of both Voting System Test Labs, VSTL by the EAC to test to this new standard.
Q. Okay. Is there -- based on the timing of that, November and December of 2022, to your knowledge is there equipment currently being used in the United States that has not been
tested at the VVSG 2.0 level?
A. I'm not aware of any equipment that has been certified under 2.0 .
Q. Okay.

MR. BELINFANTE: We can take this down.
BY MR. BELINFANTE:
Q. Let's go back to the poll worker manual, Defendants' Exhibit 1242.

Do you recall being asked --
MR. BELINFANTE: We can turn to Page 24 and 25. BY MR. BELINFANTE:
Q. Do you recall Mr. Cross asking you whether or not these two pages of the manual included the words seals or gave particular instructions on what to do with seals?

Do you recall that discussion?
A. I do.
Q. Okay. Let's flip back to Page 7 of the same poll worker manual under the last set of statutes there, 21-2-374, et cetera.

Can you just read that first bullet point?
A. Prior to the opening of polls, the poll manager will break the seal on each voting unit, turn on each unit, certify that each unit is operating properly, and set to zero.
Q. Okay. And is this part of the training that the poll worker -- excuse me, county election superintendents receive?
A. Yes.
Q. Okay. Can you turn the page to Page 8?

Can you take a look and read that second boxed piece there?
A. Verified all ballot boxes are empty, locked, and sealed.
Q. Okay. Is that an obligation of poll -- well, it is your understanding that that is an obligation of poll managers when they open the polls?
A. Yes.
Q. And what is the title of this page of the manual?

You can -- yeah, you have got it.
A. Polling place preparation. Opening the polls checklist.
Q. All right. Let's turn to Page 16 of the poll worker manual. Specifically looking at the touch recap -- touch screen recap sheet down at the bottom there.

What is in that middle column under touch screen recap?
A. Side compartment seal numbers.
Q. Okay. So the seal numbers, what is -- why is that there or what is that -- what is the effect of that being on the touch screen recap sheet?
A. To list the numbers that are on the seals that are on the machine so that the poll workers can verify them.
Q. Okay. Do you see any other place on the touch screen recap where seals are something that is to be written down?
A. Yes.
Q. Where?
A. There's, starting from the left, the opening case seal number, opening power printer seal number. And then the ones that we just referenced. There's also for closing the polls compartment seals, closing case seal number, closing power printer seal number.
Q. And who is to sign this form?
A. The poll manager and two assistant managers.
Q. All right. Let's go to the one that is to its right, the scanner recap sheet.

MR. BELINFANTE: If we could zoom in on that.
BY MR. BELINFANTE:
Q. Do you see any portion here that is supposed to address seals?
A. Yes.
Q. Where?
A. Starting from the top, there are the columns for the $L \& A$ seals from the front. And then over through each column, the front lock lid seal -- back lock -- or back lock lid seal, and so on. And then down below that are additional places for seals to be recorded.
Q. Okay. Who is to sign that document?
A. The poll manager and two assistant managers.
Q. All right.

MR. BELINFANTE: Can you zoom out a little bit there?

And -- okay. Yeah.
BY MR. BELINFANTE:
Q. Now, that is showing the supplies. Let's turn to -THE COURT: What is the exhibit number again?

MR. BELINFANTE: It is Defendants' Exhibit 1242, Your
Honor.
BY MR. BELINFANTE:
Q. That is talking about the supplies. Let's look at Page 30 of the poll worker manual.
A. Okay.
Q. What is this page conveying to potential poll workers and certainly -- or potential poll workers and others?
A. So this page covers information about the touch screen recap sheet and the scanner recap sheets.
Q. So does it provide an actual explanation of the documents that we just looked at?
A. Yes.
Q. Okay. Can you read the first bullet point under touch screen recap sheet?
A. This form is used to verify the touch screens were sealed when the polls opened and closed on election day. This form also provides a summary of the printed ballots on election day. Q. If you could go down to the fifth bullet point starting with when polls close.

MR. CROSS: Your Honor, just briefly, object to
relevance. There is no foundation this witness knows whether any of these forms have ever been completed. None have been produced. So I'm not sure what the point of this is if they are not going to be used.

MR. BELINFANTE: Two things, Your Honor. One, this was a question brought by Mr. Cross. I'm trying to point out that the poll worker manual -- I'm guessing the implication was ineffective because in two pages it doesn't have seals. This -- I'm walking through and showing where it is in the poll worker manual, so I think any objection would be waived.

Two, in terms of relevance, it shows State efforts in terms of what the expectation is on seals. If they want to say that seals are irrelevant, $I$ think we could probably cut down a lot of the testimony we've already heard.

And, three, the point that he can certainly argue and has on cross-examination whether the documents have been provided back to the State and what the State does with them.

THE COURT: Could I see the manual -- the manual again? I know I saw it, but I'm not sure ...

I have it. The latest update was May of '21?
MR. BELINFANTE: That is the one we're using, yes, Your Honor. And I believe that is the latest update.

THE COURT: Let me just ask you this: Do you have any knowledge that these are actually being completed -- these forms that are referenced?

THE WITNESS: It is the county's responsibility to make sure that they are completed. I know there are instances where they are not completed properly.

But generally, yes, these are the forms that are used.

THE COURT: Have you ever reviewed them, actually be -- any sort of sampling of them when you have gone out to visit counties?

THE WITNESS: We have received forms back and have reviewed them -- a sampling. Our office has done that, yes. THE COURT: Have you yourself?

THE WITNESS: Yes, I have looked at a sampling.
THE COURT: And where was that from?
THE WITNESS: I believe that they would have been from the November 2022 election.

THE COURT: So is the process for -- is the -- is the county required to send back the forms or is this just -- this is sort of a suggested management tool that they will use and maybe somebody may ask them to send in at some point?

THE WITNESS: So on the top right of the forms, it tells them -- because these are like triplicate forms. So it says where they have to --

THE COURT: So I'm just looking for the page for the form on the top right. Can you read that -- from what page is it? Can you see from the --

THE WITNESS: So one copy goes to the Secretary of State. One copy goes to the clerk of superior court. And I believe another copy stays with the election superintendent. THE COURT: Does it say that on the form you have in front of you?

THE WITNESS: I'm reading the very small print that is on the bottom.

THE COURT: I see.
And what is the page from that?
THE WITNESS: This is Page 30.
THE COURT: Page 3 or 30?
THE WITNESS: 30.
THE COURT: So the language you read came from the top right corner of that page? Is that what you are saying? THE WITNESS: The -- yes. The top right corner of that page informs the county where to send the documents, the copies.

THE COURT: Okay. I'm going to allow counsel to proceed.

MR. BELINFANTE: Thank you, Your Honor.
BY MR. BELINFANTE:
Q. We can take that -- well, I think the question -- yeah, we were back on this, and I was asking about bullet points.

What is -- looking, if you could, because $I$ think this is where the question interrupted you.

Director, could you just read that second highlighted bullet point there.
A. When the polls close, the poll workers will verify the opening seals are intact. A checkmark should be placed in the compartment seals verified/intact column. The closing seal numbers and closing count should be recorded for each touch screen in use.
Q. Let's go down to the scanner recap sheet heading there. And can you read the first bullet point there?
A. This form is used to verify the scanner was sealed when the polls opened and closed during the election. This form also provides a summary of the vote counts during the election. Q. Okay. What about the fifth bullet point there? What does that information convey?
A. The seal number must be provided for the items below: Front and back lock lid, ballot box, poll worker and administrator memory card slots, scanner lock, and emergency bin.
Q. All right. And is that reflected in the scanner recap sheet document, which is also on the page at the bottom right that we looked at earlier?
A. Yes.
Q. All right.

MR. BELINFANTE: Your Honor, I just have two more of these that should move pretty quickly.

BY MR. BELINFANTE:
Q. Can you turn to Page 96 of the document?

What is the heading of this document?
A. Closing the polls election forms.
Q. Okay. Can you read the second bullet point under touch screen recap sheet?
A. When the polls close, the poll manager will verify the seals are intact. A checkmark should be placed in the verified/intact column. The closing count and closing case serial numbers should be recorded.
Q. All right. And how about the scanner recap sheet provision there? Can you read the second bullet point under that?
A. When the polls close, the poll manager will verify the seals are intact. The closing count should be recorded.
Q. As the election director for the state of Georgia, is it your expectation that these provisions will be followed?
A. Yes.
Q. Okay. Let's look -- and that goes for -- you know, the -those two.

Let's look again at Page 98.
What does this document or this portion of the poll worker manual address?
A. A portion of what to do when closing the polls.
Q. And can you read the second to last bullet point on that

## page?

A. Make sure all machines are sealed at the end of the day. MR. BELINFANTE: All right. Your Honor, my next
series of questions goes to a different topic, so I'm happy to keep going or take a break?

THE COURT: How long is that topic?
MR. BELINFANTE: It is going to be similar. We are going to go through some State Election Board rules.

THE COURT: Why don't we take a break?
MR. BELINFANTE: I thought you might want to. I get
the dry witnesses sometimes.
THE COURT: All right.
MR. BELINFANTE: You're not dry. The topic is dry.
THE COURT: Let's start at ten after 1:00.
You're excused.

## (A lunch break was taken.)

THE COURT: Go ahead and proceed.
MR. BELINFANTE: Thank you, Your Honor.
BY MR. BELINFANTE:
Q. Director Evans, right before we left, we had walked through the poll worker manual and shown various places where seals and sealing election equipment was addressed.

To your knowledge, are those requirements or those provisions about seals reflected in SEB rules?
A. Yes.
Q. Okay. To your knowledge, what happens if a county is found to have potentially violated a State Election Board rule?
A. The case would get presented to the State Elections Board and the State Elections Board would make a determination on the penalty for that.
Q. Okay. You were asked by Mr. Cross, I believe, about whether you were aware that voter cards that are used in the Dominion BMDs in Georgia can be counterfeited so that they allow unlimited voting.

Do you recall a conversation like that?
A. I do.
Q. What would happen -- or at least in terms of your understanding, if a voter tried to vote twice in a Georgia election, would the system -- is it set up to be able to detect that?

MR. CROSS: Your Honor, depending on what he is asking for, he set it up with reference to a cybersecurity and computer science finding. He can't speak to that.

MR. BELINFANTE: And he can't answer the question that was posed. He did answer, so I think now he can explain his answer. And specifically, we can look at the transcript. It was 247, 21 and 23.

He can explain his answer.
MR. CROSS: What was the Q and A, Josh?
MR. BELINFANTE: I'm sorry. Yeah, it's, are you
aware that voter cards that are used in Dominion BMDs can be counterfeited so they allow unlimited voting?

The question is, what happens if a Georgia voter tries to vote twice?

MR. CROSS: I thought he testified he wasn't familiar with this. There is no foundation for him to respond at all. And he would be speculating, and he doesn't have the expertise to answer that.

THE COURT: So what was his answer again?
Could you read the answer.
MR. BELINFANTE: That part I don't have, Your Honor. That would be the wise thing. I do have it pulled up, though. It will take me just a couple of seconds if I can figure out page up versus page down.

If anybody wants to beat me to it, it is 247,21 to 23.

Answer: I don't -- let's see.
Question: Were you aware you can use the same voter card to vote --

THE COURT: Go a little slower, please.
MR. BELINFANTE: Question: Were you aware that voter cards that are used in the Dominion BMDs in Georgia can be counterfeited so that they allow for unlimited voting? You can use the same voter card to vote as many times as you want? Were you aware of that?

BY MR. BELINFANTE:
Q. Director, do you have an understanding as to whether Georgia law allows a single voter to vote twice in the same election?
A. Voting twice would be a violation of Georgia law.
Q. Are there methods to set up within the election system to detect a voter who may attempt to try to vote twice?

```
    MR. CROSS: Just to be clear, we're talking
procedural methods; right?
```

MR. BELINFANTE: Correct. I'm not getting into cybersecurity. We'll see what his answer is, but I think -BY MR. BELINFANTE:
Q. But yeah, you can answer.
A. Yes.
Q. What are the methods by which Georgia attempts to detect whether someone is voting twice in the same election?
A. So there are multiple. One would be to try to prevent somebody from being able to say, for example, put multiple sheets into a scanner. A BMD ballot is one 8 and a half by 11 sheet of paper. So if a poll worker were to see somebody approaching with two sheets of paper to scan through a precinct scanner, which can only scan one at a time and that person had two, then that would be one point where it could be detected and prevented.

There are other ways that if somebody were to attempt to vote twice or did vote twice that we would detect it. We -after federal general elections, through our membership in ERIC, they provide us with an in-state report of potentially people with duplicate registrations who may have cast a ballot under each registration.

THE COURT: But that is really for people who are voting in two different states, isn't it?

THE WITNESS: Well, it is two different reports.
There's an in-state report, and then the one that is probably a little bit better known is the one that compares our voter list against other states' voter lists. So that would be another avenue to capture somebody if they voted in two states.

But we also get a report that would detect potentially somebody who had duplicate registrations and voted under each registration.

THE COURT: So you are saying like I was registered in Fulton and in DeKalb, or you are saying that $I$ registered twice in Fulton?

THE WITNESS: So there are things in place to prevent duplicate registrations. But in the event that somebody were to have duplicate registrations -- and many times that is due to clerical error -- if somebody were to know that and attempt to vote under each registration, then we have a method in place to be able to try to identify that so we can investigate it.

THE COURT: So how often does that happen?
THE WITNESS: That is very rare.

THE COURT: Okay.

BY MR. BELINEANTE:
Q. Looking at election day itself, could we pull up the poll worker manual, Defendants' Exhibit 1242 , and turn to Page 16.

Do you see that ballot recap sheet at the top?
A. I do.
Q. Are you familiar with the ballot recap sheet?
A. I am.
Q. What does it measure?
A. So it is used to reconcile at the end of election night. So poll workers will use this form to reconcile their numbers at the end of election night.
Q. Okay.
A. And what I mean by that is there is a spot at the bottom to put Poll Pad check-ins. There are places to indicate how many ballots were printed from the ballot-marking devices. There's places to put the number of ballots scanned by the scanner and then to make sure that those numbers match. And if they don't, to indicate -- or to indicate also spoiled ballots and that kind of thing, so it would be an accounting of all the ballots.
Q. And who signs that document?
A. The poll manager and two assistant managers.
Q. And looking at the top right -- I know it is blurry -- but are you able to make out -- I'm sorry. Same document. Real blurry.

Are you able to make out or do you know where the ballot recap sheets are to be returned, or at least a copy of them?
A. So I believe it is the clerk of the superior court, the elections superintendent, and the Secretary of State.
Q. Okay. Thank you.

Do you have still in front of you a notebook that has your name on it and January 23rd, 2024?
A. I do.
Q. Could you turn to Tab 4.

MR. BELINFANTE: And, Mr. Cross, there's two exhibit stickers. I think we admitted -- or it was admitted as Curling Plaintiffs' 100 as opposed to 4, but I can't recall.

MS. KAISER: It is the yellow one.
MR. BELINFANTE: It is the yellow one? All right. BY MR. BELINFANTE:
Q. Referring you to Curling Plaintiffs' Exhibit 100, do you recall a series of questions about this?
A. I do.
Q. All right.

THE COURT: I'm sorry.
Which tab was it in?
MR. BELINFANTE: Tab 4.
THE COURT: Okay. Fine. Thank you.
MR. BELINFANTE: Mr. Montgomery, could you -- are you
able to black out the voter's personal information up there?
Yes. Perfect. Thank you.
BY MR. BELINFANTE:
Q. You were asked about this email from, one, Laura Jones, and understanding that it was admitted not for the truth of the matter asserted, meaning we don't know if this happened or not.

But if you go down to her narrative on the one, two, three, four, fifth line, the sentence starts, one of our machines.

Do you see that?
A. Yes.
Q. All right. Can you just read that sentence and the next?
A. One of our machines did show one ballot had been cast on it. We did not use this machine, but we did use all the other machines that had the elections database door open.
Q. Was it proper not to -- based on your understanding of what county election officials are to do, was it proper not to use the machine that showed one ballot had been cast on it?
A. I believe that was a proper way to proceed.
Q. All right. And this email came in, it looks like, on November 5 of 2020.

Do you see that?
A. I do.
Q. Okay. Do you recall, roughly, was that at or around the time of the 2020 general election in the State?
A. It was two days after.
Q. All right. And what time, if you can scan up, did you see that Mr. Harvey responded to Ms. Watson's email?
A. The day after it was received from Ms. Watson.
Q. And going back to Ms. Jones' email there at the bottom, I know we've taken out -- we can bring in the county line. I
don't need this part.
Looking at the county part -- because I know you've got an unredacted up there with you -- what county was Ms. Jones reporting challenges or issues at the Temple Emanu-El voting location?
A. Fulton.
Q. And in November of 2020, you were at the Secretary of State's office and not Fulton County; is that right?
A. Yes.
Q. Do you recall whether there was a State Election Board investigation into Fulton County with regards to 2020 election incidents?
A. Yes.
Q. And was there an investigation into Fulton County?

MR. CROSS: Your Honor, just I'm going to object to relevance because Mr. Belinfante is connecting things that aren't connected, I think. We asked him whether he was aware of an investigation having occurred into this incident. His testimony, as I recall, was he didn't know. And now Mr. Belinfante seems to be implying that some other investigation got to him. So there has got to be foundation to make that connection.

MR. BELINFANTE: Yeah, I think my question, at least the intent of it -- I think the language was about Fulton County, not this incident, so I highlighted --

## (Unintelligible cross-talk)

THE COURT: That is exactly what he is complaining about, though. And I don't know whether you are getting into comparable incidents in Fulton County or what. I mean, I just don't know that it is relevant.

MR. BELINFANTE: I can withdraw.
THE COURT: I'll let you ask a question, but I'm not really interested in having this about Fulton County generally since that wasn't the issue.

MR. BELINFANTE: I will withdraw the question and perhaps ask a more targeted one.

THE COURT: Thank you. BY MR. BELINFANTE:
Q. To your knowledge, did the State Election Board receive numerous complaints involving the conduct of the general primary and general election in Fulton County in 2020?
A. Yes.

MR. CROSS: Same objection, Your Honor.
THE COURT: I just don't know that it is -- I'm going
to let you have that in, but I'm not going to let you go further to discuss them if it is not relevant to this.

MR. BELINFANTE: I think -- if I could be given two more questions, I think we can resolve it. I don't plan to go deep into a rabbit hole on this.

THE COURT: Okay.

BY MR. BELINFANTE:
Q. Mr. Evans, you were aware that complaints came in.

Did the State conduct an investigation into Fulton
County's conduct during the general and primary elections of 2020?
A. Yes.
Q. Okay. And for the record, the November 5 -- or November 2020 election, was that the first general election that the BMDs were used throughout the State general election as opposed to a primary?
A. Yes.
Q. Okay. And typically, do you see higher voter turnout in a general election or in a primary?

MR. CROSS: Objection. Leading.
BY MR. BELINFANTE:
Q. Where do you see higher voter turnout? In a general primary or in a general election?
A. General election.
Q. Okay. Let's turn to Exhibit 608, I believe it is. It is Tab 16 in that same notebook of yours.
A. Okay.
Q. Do you recall having discussions about this document?
A. I do.
Q. What is the date that the alleged violation occurred, if you can tell?
A. December 31st.
Q. Okay. Of what year?
A. 2020 .
Q. All right. And what date, if you can tell, did an email come into the vote -- or voter fraud email alerts at sos.ga.gov email address?
A. Tuesday, January 5th of 2021.
Q. Do you recall if there was an election being held on Tuesday, January 5th of 2021?
A. There was.
Q. Was it statewide?
A. Yes.
Q. All right. And when the email comes in on the day of the election, at what time did -- if you can scroll up -- how long did it take Ms. Watson to respond to the email, at least in internally, from what you can tell?
A. She responded on Friday, January the 8th, so three days.
Q. Okay. And when did you respond to her email to you?

Or respond might be the wrong word.
When -- your email is at the top; correct?
A. Yes.
Q. And when did you -- and who is Scott Tucker again?
A. Scott Tucker was with Dominion Voting Systems at the time.
Q. All right. And how long after you received Ms. Watson's email did you respond to him?
A. I forwarded it to him the next day.
Q. All right. The email discusses, at least in Ms. Watson's relay of it, that the ballot or the complaint that came in had a $Q R$ code only on it.

What did you relay to Mr. Tucker about the frequency of that occurrence?
A. That it was the first $I$ had heard of it.
Q. Have you seen this situation described?

And again, we're not acknowledging it actually occurred
for the truth of the matter.
But have you seen the situation described in the complaint email below happen frequently in Georgia?
A. No.
Q. Have you seen it since this description of it in the email?
A. I have not.
Q. Okay. Let's go to 609 -- Exhibit 609, which is the same notebook, Tab 17.

THE COURT: I'm sorry. I'm a little bit confused here. You went through all of this and then we don't -- is 17 the response on it?

MR. BELINFANTE: No. It is a separate email altogether, Your Honor.

THE COURT: So is there anything besides this one
page --

```
    MR. BELINFANTE: On Tab --
    THE COURT: -- relative to the issues in Tab 16 about
the QR code printing incompletely or that's the voter
complaint?
MR. BELINFANTE: Yeah, I don't have anything else other than what he has just testified to on that document.
THE COURT: So did you follow up about that, other than sending the -- making Dominion aware of the complaint?
THE WITNESS: I would have to check with our chief investigator to see if there was a case and whatever investigation ensued following that.
THE COURT: So you don't know at this time?
THE WITNESS: I don't know at this time.
THE COURT: You don't recall Dominion getting back to Mr. Tucker who was with Dominion Voting either?
THE WITNESS: Correct.
THE COURT: Okay. Thank you.
BY MR. BELINFANTE:
Q. And just to clarify then, since what is described here in the complaint email, have you seen a situation again in Georgia where a voter claims that they had received -- their ballot printed from a BMD contained only the \(Q R\) code?
A. I have not.
Q. Okay. Let's go to Tab 17, which is Curling Plaintiffs' Exhibit 609.
```

A. Okay.
Q. Again, this is not -- this has not been admitted for the truth of the matter asserted.

But could you just take a look back and see what the alleged event was and the description of violation provision there.
A. Okay.
Q. This was from -- what date did that complaint come in?
A. It came on January the 6th of 2021.
Q. Okay. And have you seen that type of complaint repeated frequently in the State of Georgia in elections?
A. I have seen this type of complaint since then.
Q. Okay. And what is the State -- or has the State done anything to address complaints like that?
A. So to summarize, if a voter access card gets used, comes back to the ExpressPoll, and gets put into the Poll Pad to be encoded again, there are instances where if the poll worker, for example, pulls it out too fast and the card doesn't get fully encoded, since the card has already been used and a ballot has been printed from the card, the voter goes and inserts the card into the machine and the BMD displays this message of card already voted.

So next time that we do a software update, that is something that we want to change is the verbiage on the screen. Q. If the situation you described happens, is a voter not

```
permitted to vote?
```

A. The voter can still vote.
Q. And how would that happen?
A. The voter would notify a poll worker that the card was not encoded properly. They would go back to the check-in table and encode another card.
Q. All right. Could you turn to Tab 13 in your notebook and look at Curling Plaintiffs' Exhibit 606 .
A. Okay.
Q. You were asked a question about an email you sent there at the top.

What is the date of that email?
THE COURT: I'm sorry. Could we just stop here. MR. BELINFANTE: Yes, Your Honor.

THE COURT: I mean, I'm trying to put together your answer with what Mr. Tucker wrote you on the 12 th of January at 9:42 A.M.

So you basically decided there was nothing that could be done for now, it seemed, if the file were not modified on each server. Scott wrote you, and a new BMD tabulator were created on a local server that was not modified, we run the risk of BMDs displaying different messages when a blank voter card is inserted.

And they are just saying -- and then he says, I'm not sure how long it will be until we certify a new software
version, but we may want to look at modifying this verbiage at that time.

Which you kind of agreed.
So -- so is he just saying there is no software fix for this problem?

THE WITNESS: So, essentially, there is now, for example, the 5.17 that we talked about would allow us to -since we're going out or since it would be a reinstallation on every ballot-marking device.

THE COURT: But you're not using 5.17 and haven't purchased it yet; right?

THE WITNESS: Correct. Correct.
So one of the ways that counties have, since this, been able to reduce the instances of this is through poll worker training, making sure that their poll workers who are checking in voters know to make sure to leave the card in long enough until it gets encoded.

So they have adjusted. We still hear about this from time to time. But just from using the equipment, there has been an adjustment made.

THE COURT: Thank you.
BY MR. BELINFANTE:
Q. All right. Could you, if you are not there, turn to Tab 13, which is Plaintiffs' Exhibit 606.
A. Yes.
Q. All right. You were asked questions about an email you sent on October 22 nd of 2020.

Do you see that?
A. I do.
Q. Okay. What is an L\&A upload?
A. So a logic and accuracy upload refers to a test upload into the election night results reporting system. So, essentially, after a county will conduct their own logic and accuracy test, they take some results from a test deck, get a file from their election management server of those results. And then just like they will on election night, they will take that file to a computer that is connected to the internet and then upload the file into the election night results reporting system, which is how we broadcast results publicly.
Q. All right. Could you turn to Tab 14 of your notebook, which contains Plaintiffs' Exhibit--

MR. BELINFANTE: I don't know if it is Plaintiffs' or Curling Plaintiffs'. Y'all used it. I just can't recall how we're designating it. It is Exhibit 607, is the number I have. MR. CROSS: Curling.

MR. BELINFANTE: Curling Plaintiffs'.
BY MR. BELINFANTE:
Q. You recall getting questioned about that combined with what is behind Tab 15, which is sequentially the next number on those bottom numbers?
A. I do.
Q. The email back on the first one at Tab 14 shows it going to Chris Harvey.

Do you know if it was -- if that document was sent to others in the Secretary's office?
A. So it looks like it went to Chris Harvey and also Breanna Thomas.
Q. Who is Breanna Thomas?
A. Breanna Thomas at the time, I believe, would have been the training administrator.
Q. Okay. Do you know if it went to anyone else -- if they forwarded it to anyone else in the Secretary's office?
A. I'm not sure.
Q. Last little bit of questions.

You were asked earlier about roughly the population of
Escambia County, Florida.
Do you recall that?
A. I do.
Q. And what was your answer again?
A. If I remember correctly, when I left, there were about 215,000 registered voters.

MR. BELINFANTE: Your Honor, at this point I have -and I will show opposing counsel -- census data pulled -- that shows the population of Cherokee, Chatham, DeKalb, and Fulton Counties in Georgia.

```
We would ask if the Court would take judicial notice of the populations of these Georgia counties. It is based on census data pulled from the website a moment ago.
THE COURT: What is the point?
MR. BELINFANTE: The point is to provide the Court with context because there has been a series of questions on both sides about administering elections in Escambia County, Florida, with a population of roughly 215,000, and some of Georgia's larger populations here, which exceed that number. MR. CROSS: Yeah, I'm not sure how to respond, Your Honor. We're seeing this for the first time. I'm not sure I get the relevance, and I don't have any way to authenticate it. Can we discuss and get back to the Court? THE COURT: Sure. We will -MR. BELINFANTE: We can -THE COURT: I mean, you could -- I mean, the Court can take --
MR. CROSS: Rob --
MR. McGUIRE: And also, I'm not sure it is comparable, Your Honor, because this is population, and he is answering in terms of registered voters, which is two different bases.
MR. BELINFANTE: Well, if you look, I would say to that, under age and sex, there is a category of persons under 18. I see the point.
```

MR. CROSS: Then we're going to object, Your Honor.
Now we realize what is happening.
THE COURT: I mean, I don't think this is useful if it doesn't have the number of voters.

MR. BELINFANTE: Fair enough. Fair enough. I can --
let me ask --
THE COURT: I think the differential population size can be -- which you can infer some difference in the voter size, I can recognize. I mean, I don't have the exact numbers, obviously.

MR. BELINFANTE: And I don't recall, Your Honor, candidly, if the question was about the number of voters in Escambia County. And let me ask it -- so let me just ask the witness. This will be like two or three questions. BY MR. BELINFANTE:
Q. Do you recall roughly how many registered voters there were in Escambia County when you left?
A. 215,000 .
Q. So that is --
A. Around there.
Q. When you left Fulton County, do you recall roughly how many registered voters there were in Fulton County?
A. Around 7- to 800,000.

MR. BELINFANTE: I have no further questions at this time, Your Honor.

MR. CROSS: All right. This won't be long.
THE COURT: Can you give this back to them? There's enough on my plate.

## RECROSS-EXAMINATION

BY MR. CROSS:
Q. This won't be long, Mr. Evans.

You had a lot of questions about the oath that election officials and poll workers take.

Do you recall that?
A. I do.
Q. You said there's an expectation that they comply with their oath; right?
A. Correct.
Q. Was that -- do you know -- I mean, as the deputy election director in January of 2021, did you have the expectation that the election officials in Coffee County would comply with their oaths?
A. Yes.
Q. Fair to say that they did not?
A. Correct.
Q. All right. If you can grab Exhibit 1242 real quickly, the Secure the Vote manual that we have walked through.

Do I understand correctly the date on this of May 2021 -this is the most current version?
A. I believe so, yes.
Q. So it has not been updated since the State learned about the breaches in Coffee County; right?
A. I do not believe there is a more updated version.
Q. Okay. If you flip to Page 7, you were asked a number of questions about the privacy setup. I just want to make sure that we're still in agreement.

There is no dispute that Georgia law requires the BMDs shall be arranged in such a manner as to ensure the privacy of the elector while voting on such devices.

We're still agreed on that?
MR. BELINFANTE: Objection only to the extent he's
asking for a legal conclusion. He can ask about his understanding.

BY MR. CROSS:
Q. We're agreed that your understanding is that is what is required?
A. Yes.
Q. And if you come back to Page 5 in Exhibit 1242, there is a list of statutes and election offenses involving operation of the polls.

Do you see that?
A. I do.
Q. And the third one, which Mr. Belinfante did not ask you about, is intentionally observing an elector while casting a ballot; right?
A. Correct.
Q. And is it your understanding that applies to poll workers and election officials too; right?
A. Yes.
Q. A poll worker, to your understanding, would not be allowed to intentionally watch an elector while they are in the voting booth; correct?
A. Would not be allowed to infringe upon the voter's privacy or try to view what they are -- what -- the choices they are making on the screen.
Q. Intentionally observe an elector while casting a ballot, your understanding that that is illegal; right?
A. Yes.
Q. If you flip -- this is the last question on this. Flip to

Page 61, if you would. This was another one you were asked about.

Again, we've got the setup here of a BMD with the printer inside the blue privacy screen; is that right?
A. Yes.
Q. And you understand -- you see how the BMD is pushed back towards the back of the table inside the screen and then the screen comes around the side of it?
A. I do.
Q. And you understand the power button that can reboot the machine is on the back of the machine; right?
A. It is on the side compartment, the bottom right-hand.
Q. Do you think it is on the side or on the back?
A. The power button, you open the door on the side and it is -- reach your hand back, so kind of back side.
Q. Okay. And you are not offering any testimony that a voter who would hold that button down in under five seconds necessarily would be seen doing that inside this screen; right?
A. I have not commented one way or the other on that.
Q. You're not offering a belief that that would be necessarily seen?

COURT REPORTER: I can't hear you.
BY MR. CROSS:
Q. You are not offering a belief that that necessarily would be seen; right?
A. No.
Q. In some -- at least in some precincts, the machines are set up where the screen faces a wall; right?
A. Correct.
Q. In that situation, no one would be able to stand behind the voter because they are at a wall and no one is allowed to stand behind them if the machine is within six feet of the wall; right?
A. If the machine were within six feet of the wall, then correct.
Q. There was a little bit of talk again on the passcodes that
are used for the scanners, the key, and you said, I believe, that the reason why you guys have disregarded Dominion's recommendation and done it at a countywide level is easier to administer than having a lot of different passcodes for poll workers; is that right?
A. I believe I said less risk.
Q. You think that is less risk?
A. Correct.
Q. So you disagree with Dominion on the risk here?

THE COURT: Or is it just a different risk?
THE WITNESS: Less risk.
BY MR. CROSS:
Q. So you disagree with Dominion?
A. I don't -- I think there's some jurisdictions where their guidance should be followed in regard to this, and I think there's some where it should not.
Q. But the manual that was provided to Georgia with the machines by Dominion recommends not to do it the way you're doing; right?
A. Correct.
Q. So you disagree with Dominion on how this -- at least this security measure should be handled; right?
A. For our state, yes.
Q. And you don't -- who made that decision?
A. I know that we have discussed it internally, and so,
collectively, that is the decision that has -- that we have come to.
Q. And you have not identified anyone with cybersecurity training as having been involved in that decision, have you, sir?
A. I do not remember the -- anybody with that specific training being involved.
Q. I believe one of the reasons you gave for this also was that if there were a lot of different passcodes that had to be entered to set up the polling sites that could slow down the setup; is that right? And that could cause long lines?
A. No. I don't believe I used the term slow down.
Q. Fair enough. But I'm trying to capture what you said.

Let me ask you this way: When you were offering an explanation on why you guys have disregarded Dominion's recommendations, you said something to do with long lines.

What is the connection you were drawing?
A. So I'm not 100 percent sure that I said long lines. I think that might have been part of the question.

But the concern would be that -- the concern would be that the correct passwords would not get to the intended precincts, which could potentially cause election equipment to not be open by the time the polls open at 7:00 A.M.
Q. And the concern was that that could create lines while people wait?
A. Yes.
Q. The State Election Board actually has a rule that if lines get longer than 30 minutes you go to hand-marked paper ballots; is that right?
A. You have the rule $I$ can reference?
Q. You are not familiar with that rule? You don't recall it?
A. I remember it generally, but it would be helpful if I could read it.
Q. Well, let me ask it this way: At a general recollection, do you understand that that rule exists?
A. Yes. I remember the rule generally, yeah.
Q. And so the SEB itself has determined how to deal with long lines without diluting security in the way that you guys have decided to do it; right?

MR. BELINFANTE: Objection. He is now being asked what the SEB --

MR. CROSS: I was wrong. I'll withdraw.
BY MR. CROSS:
Q. All right. Mr. Evans, you also talked -- you were asked some questions about VVSG 1.0 versus 2.0 .

Do you recall that?
A. I do.
Q. And are you familiar with Dr. Ben Adida?
A. I am.
Q. In your role as state election director, have you worked
with him in his role working with the state on audits and other things?
A. Yes.
Q. And are you aware that Dr. Ben Adida in May of 2020 asked the EAC to require all voting vendors and their machines to comply with VVSG 2.0?
A. I am not aware.
Q. That is not something you have discussed with your expert?
A. It is not something I've discussed with Mr. Adida.
Q. Were you aware that he also raised a concern that the machines that are being used under VVSG 1 are complying with the standard that existed before that is older than the iPhone?
A. I have not heard that exact phrasing.
Q. Do you think it might be valuable to speak with Dr. Adida about his concerns on VVSG 1.0 versus 2.0?
A. I think there is a lot of things that it would be valuable to speak to Dr. Adida about.
Q. Lastly, you were shown a bunch of different forms that the counties use.

Just so we're clear, the form -- the different forms you walked through, you don't actually know how often county workers complete those forms? That is not your responsibility; right?
A. I have sampled them, but I do not look at all of them.
Q. You don't know if they are regularly completed; right?

MR. BELINFANTE: Objection. Vague.
THE COURT: Well, regularly --
MR. CROSS: I can ask it differently.
THE COURT: Go ahead.
MR. CROSS: I can ask it differently.
BY MR. CROSS:
Q. You don't know if they are completed in every instance that they are required to be completed; right?
A. Correct.
Q. And you don't know if they are carefully completed, meaning everything that is supposed to be included is included; right?
A. Every time, no.
Q. And would it surprise you that the State has not produced any of these? You have never seen --

MR. BELINFANTE: Objection. Relevance. No
foundation. I'm not even aware of an interrogatory request to produce to recover it. There may be one. Lord knows there have been plenty, but --

MR. CROSS: I'll withdraw it.
THE WITNESS: Can you repeat the question?
BY MR. CROSS:
Q. I'm going to withdraw it, Mr. Evans, just to wrap up. Let me see if I had anything else.

You were asked the question, what happens in a county if a
county is found to have potentially violated an SEB rule? You said, the case would get presented to the SEB, and the SEB would make a determination on the penalty for that.

Do you recall that testimony?
A. Yes.
Q. You're not aware of any presentation to the $S E B$ on the breaches in Coffee County in January -- from January 2021; right, sir?
A. I believe it is still under investigation.
Q. There has been no determination or imposition of any penalties by the SEB; right?
A. Correct.
Q. You were asked about higher voter turnout in a general election versus primaries. You said there tends to be higher voter turnout in general election.

Does the volume of voter turnout impede the State's ability to secure voting equipment?
A. No.
Q. Does the volume of voter turnout relieve election workers from complying with any of the laws or the rules and regulations concerning elections?
A. No.
Q. Lastly, you had some -- walked through some different rules and regulations on seals, and you were asked about potential failures to comply with those rules.

Here is my question, Mr. Evans: Any failure to comply with the State's directives or rules regarding the seals on voting equipment, meaning failures by election workers, poll workers, that would be considered a potential security violation, would it not, sir?

MR. BELINFANTE: Objection. Vague. What is a security violation versus an SEB rule violation?

I think Mr. Cross even tried to prevent the witness from testifying about security violations, so we -- he can probably get there. He just needs to define it more, Your Honor.

BY MR. CROSS:
Q. Would you consider that a security violation as you think of that term?
A. I think the seals are there for security. So if it weren't there, then yes.
Q. Thank you.

MR. CROSS: Your Honor, there were two video clips played from the senate hearing. We had one; they had one. I think theirs may have incorporated all of ours, but it is not entirely clear, so we would move both into evidence.

THE COURT: Okay.
MR. CROSS: Our clip would be Exhibit 613, and their clip would be Exhibit 614, and we can provide that on a flash drive or something.

```
MR. BELINFANTE: We have no objection to doing it that way.
THE COURT: All right. Thank you.
They are admitted.
MR. CROSS: Thank you, Mr. Evans.
RECROSS-EXAMINATION
BY MR. OLES:
Q. Mr. Evans, I just have one or two follow-up questions as a result of the questions you were being asked.
You were asked a question in follow-up to something that I had asked you about, which is about an alleged 20,000-vote difference in the 2022 Georgia Senate race, and I believe you answered with something to the effect about what you believe was typical in such a case.
Am I correct in understanding then you do not know specifically in regard to that 2022 Georgia Senate race what may have been responsible for that particular reduction in count?
```

A. That is what I think is likely, but I would have to look to know for that -- know for sure for that specific one. Q. Okay. So as you sit here today, you can't be sure of what caused that one?
A. Correct.
Q. All right. Thank you.

Now, you were asked a follow-up question by counsel in
regard to a letter that $I$ had referred to from Governor Kemp's staff at what $I$ had incorrectly referred to as a 36 -point study from the Governor, and you said that you were generally familiar with that.

Isn't it true, Mr. Evans, that, in fact, attached to the Governor's letter was a 40-page analysis that was completed by his staff -- the Governor's staff?

MR. BELINFANTE: Objection. The basis of the objection is relevance. I believe the Court has ruled the document itself irrelevant. And to ask the witness about something that he doesn't have in front of him, I think, renders the testimony unfair.

So we can either debate the merits of the document or put it in front of him and he can testify to it, or he can testify to his recollection, which I don't --

THE COURT: I don't think I ruled on the grounds of -- I thought it was because we didn't have the document in any way authenticated, so -- and I could be wrong. It could have been exactly as you say.

MR. BELINFANTE: Your Honor, I'm happy to proceed under that. Just if the witness is going to be asked about the specifics of the document, I would just want him to have it. I don't know if you have got a copy or not.

MR. OLES: I have a copy here. But if PX 208 could be brought up, I believe he can see it on the screen.

BY MR. OLES:
Q. So, Mr. Evans, if you will take a look at that and the two-page letter and the report behind it.
A. Can we flip to the report portion?
Q. Do you see starting on that Page 3?
A. I do.
Q. Okay. And where it says review of inconsistencies and data supporting the risk-limiting audit report dated November 17, 2021 --
A. Yes.
Q. -- can you identify that as the report coming from the Office of the Governor that is attached to the Governor's letter making a referral to the SEB?
A. Yes.
Q. All right.

MR. OLES: Thank you, Judge. We move to admit PX 208 into evidence.

MR. BELINFANTE: Your Honor, I don't think we have an objection just so long as the record reflects the document speaks for itself and not any particular description of it. I don't think --

MR. OLES: We have no problem with that, Judge.
THE COURT: All right. It is admitted --
MR. McGUIRE: No objection.
THE COURT: -- with those reservations noted.

MR. OLES: Excuse me?
THE COURT: With the reservations of counsel noted.
MR. OLES: Thank you.
BY MR. OLES:
Q. Mr. Evans, one last question I have for you.

Are you familiar with the complaint before the State
Election Board concerning a Dominion $Q R$ code signature mismatch error?
A. Yes.
Q. Okay.

MR. OLES: May I approach, Judge?
THE COURT: Yes.
BY MR. OLES:
Q. Mr. Evans, I'm going to show you what was previously
marked as Davis Exhibit 10 for identification.
Can you take a look at that, please?
A. Okay.
Q. Can you identify that as a copy of the letter that -- the complaint letter that was submitted to the State Elections Board concerning the Dominion $Q R$ code signature mismatch error?
A. It appears to be so.
Q. All right.

MR. OLES: Thank you, Judge.
I do not believe I had previously moved to admit
Davis Exhibit 10 into evidence, but I believe everyone has a
copy. I would like to do so at this time.
MR. BELINFANTE: I am looking for a copy, Your Honor.
THE COURT: Is it what was posted on --
MR. BELINFANTE: It is already admitted, I'm being
told.
MR. OLES: Oh, okay. All right. Thank you.
BY MR. OLES:
Q. Mr. Evans, final question or questions.

With respect to that $Q R$ mismatch error or signature
mismatch error that was being alleged there, are you familiar with the fact that the State of Tennessee also used a Dominion system version 5.5 just like Georgia was using?

MR. BELINFANTE: Objection, Your Honor. Outside the scope of redirect.

And I didn't have a problem with the document, but
now I see where we're going. I think -- I think the line of questioning is outside the redirect.

THE COURT: Maybe I should look at the document. I mean, it is what caused you to have concerns, so --

MR. OLES: I think we're up to --
THE COURT: What is your question about the
Tennessee?
I'll just take it conditionally and decide. All
right?
MR. OLES: My question simply was going to be whether
or not Mr. Evans was familiar with the nature of this complaint -- familiar with the problem that the state of Tennessee had with the same system and that they discontinued use of the system as a result of the error that was being alleged.

THE WITNESS: So looking at -- it says Page 2. But it is of the Election Assistance Commission document under report anomaly. I believe Tennessee had 5.5-B, and we use 5.5-A. BY MR. OLES:
Q. As you sit here today, do you know, though, whether that makes a difference?
A. I remember when this has come up before, discussions with Dominion where $I$ believe that does make a difference.
Q. Okay. Mr. Evans, as you sit here today, do you know why it makes a difference?
A. I do not recall.
Q. So you don't have that knowledge?
A. Correct.
Q. All right. Thank you.

MR. OLES: I have nothing further.
(There was a brief pause in the proceedings.)
MR. BELINFANTE: Your Honor, respectfully, I would object to Mr. Oles answering what appears to be a series of questions written for him by Mr. Cross on a couple of grounds.

One, Mr. Cross has had plenty of time with the witness.

Two, there appears to be no longer a common interest between the parties, and I would like to know the basis of the conversation.

Three, Mr. Oles has had to run all of his questions by Mr. Cross and others of plaintiffs' witnesses, and for now plaintiffs to use him as a means to ask their own questions seems improper.

MR. CROSS: There is a lot built in there that is not accurate. I don't even know how to respond to that.

MR. BELINFANTE: Did you write the questions --
MR. CROSS: Yeah. You're welcome to read them because he is going to read them out here in a moment.

MR. BELINFANTE: Then that part is undisputed.
MR. CROSS: Correct. The idea that he is running questions by us, I'm not really sure what we're talking about.

MR. BELINFANTE: We watched it happen. He has had to get his questions approved. The objection --

MR. CROSS: What is the objection?
THE COURT: I don't think that is a correct description that he's had to have them approved by them. I think he had an obligation when he was bringing in new information, new evidence that had not been considered in the case or litigated in the case to make other counsel aware of
it.
He didn't have to get their approval. He just needed to consult with them.

MR. BELINFANTE: We weren't part of those
conversations, Your Honor, so I misunderstood.

THE COURT: That is all I required, and I directed them that that was professional -- what was professionally appropriate. And, you know, I'm just going to let the questions be asked and so be it.

I think this is -- I don't think it is backdoor, but
I do think it extends things. If Mr. Oles thinks they are appropriate questions and wants to ask them, he may. If he doesn't think that they are -- I mean, I know everyone here sends messages to each other at large, so -- but I just think -- Mr. Oles, just take it -- look at it and decide for yourself. Okay?

MR. OLES: I think I would like to, Judge. It should be very brief.

BY MR. OLES:
Q. Mr. Evans, were you familiar with an incident that occurred in Spalding County on October of 2002 [sic] involving allegations that a fake ballot was scanned? Are you aware of that?

MR. BELINFANTE: Objection. Spalding County is outside the scope of redirect. There was not a question about

Spalding County in the redirect itself.
THE COURT: All right. Well, let me just say, because I try normally to reserve all my questions until the end, I have a question about Spalding County, so --

MR. BELINFANTE: Fair enough. I will not object to those questions, Your Honor. Mr. Oles, however, is different. THE COURT: I understand. I would feel embarrassed at this juncture to be asking and tell him he can't. MR. BELINFANTE: Understood, Your Honor. THE COURT: So don't embarrass the judge. BY MR. OLES:
Q. Are you familiar with the incident, Mr. Evans?
A. From October of 2022, yes.
Q. All right. And so you are aware that election officials identified one ballot that they believed to not look like the other BMD ballots, and they threw that one out?

Are you familiar with that?
A. I believe they excluded it, and that ballot became part of an investigation.
Q. My question is this: Does the State have any policy for how it would handle that situation if all the ballots that were -- were tabulated looked legitimate?
A. I'm not sure I understand the question.
Q. Okay. Well, does the State have any policy around how such a thing should be handled?
A. If the ballots look illegitimate?
Q. Yes.
A. So there are a lot of factors at play here. With that particular -- that particular instance, the elections superintendent or the elections director in Spalding noticed that her counts were off. And so there was a difference between the number of voters that had been checked in and the number of ballots that had been printed from her BMDs and the scanner, and so that prompted her to do what she deemed to be appropriate, which was to further investigate.

So I believe what they did was they completed a -- I think they completed a voted ballot removal form and took the ballots out and began to count the physical sheets of paper, and in doing so found this ballot.

And so it is hard to answer a blanket statement because there are other factors in play of what -- why does somebody think that a ballot is illegitimate?

In the case of Spalding, it was because her numbers were off. She had so many voters checked in, so many ballots printed, and her scanner was coming up one more than that.

So it is hard to provide a blanket answer because it depends on several other factors at play.
Q. Well, and would it be possible then that the answer for this was that you might have to rerun the entire election?
A. There are -- there are places in law that outline election
challenges, and so if there were -- or an election contest.
And so if there were an election contest, then a judge could order that a -- for a variety of reasons that an election would need to be conducted again.

MR. OLES: All right. Thank you, Mr. Evans.
EXAMINATION
BY THE COURT:
Q. Wednesday seems like a century ago when I last talked with you.

But let me ask you this question, and I probably won't be very capable of refreshing your memory if I have to, so I might have to turn it over to somebody else.

I think we discussed -- spent a little time on Wednesday discussing the Spalding County incident where the Secretary of State's office replaced the Spalding County EMS server.

Do you remember that?
I mean, what happened was that you told me that Michael Barnes was the man to ask, that you didn't know, I think, something like that.

And I think the record will reflect that at least there was testimony introduced indicating that the State took possession of the old server when it replaced -- might have taken possession or might not have taken possession of the old server when it replaced a new one.
A. Are we --
Q. Mr. Barnes was not sure.
A. I'm sorry, Your Honor.

Are we talking about Spalding or Coffee?
Q. Spalding.
A. Spalding.
Q. I could give you -- it is Plaintiffs' Exhibit 194 so you could look at what I'm talking about.

THE COURT: If counsel could present 194 because I've got mine marked up.

MR. FISHER: We put it on the screen, Your Honor.
THE COURT: Is it on the screen now?
Okay. Can you start with the old -- with the -- make him -- do you have the original copy?

MR. BELINFANTE: Your Honor, I was just going to point out, if you wanted the hard copy, it is in your notebook entitled Blake Evans at Tab 5.

BY THE COURT:
Q. Don't start on the first page. Start at -- it really starts -- at least if these timestamps are right at -- with the communication from Ms. Slaughter at 7:45 A.M.
A. Okay. This is very helpful.
Q. Okay. Do you want to take a moment to look at it?
A. Just about 15 seconds or 20 seconds.
Q. That's fine.
A. Okay.
Q. Okay. I think beforehand that you testified you didn't recall the specifics about the replacement and I should talk to Mr. Barnes, but I didn't get terribly far, so I don't know whether you looked at this -- these communications before or not.

But do you feel like you remember the incident enough for me to answer a few questions, possibly?
A. I remember certain things about this particular incident.
Q. Is there actual -- do you have any concrete information whether the State actually took possession of the old server?

We know that they replaced it with a new one, but $I$ don't know where the old server went, and I wasn't able to get to the bottom of that before.

Do you have any knowledge about that?
A. Not off the top of my head.
Q. Are you able to provide any information as to whether there is a policy written or otherwise related to when county equipment should be replaced and how to handle the replacement and the computer systems that have been replaced? What happens to them?
A. I would have to look. Sometimes -- sometimes it depends on why that server is being replaced. There are times where the county still needs to be able to access the old information maybe for records retention purposes to be able to retrieve old files, old ballot images. And in those situations, it might

```
stay with the county.
```

As far as a written policy, I would have to look. I'm not sure.
Q. And I know your last letter in this chain -- this letter that ends to Mr. Johnson, who I guess was -- was he president of the board?
A. He was their board chair.
Q. And Ms. Slaughter, and she was the new election officer for the county.

You suggest that it would be helpful to get on a Zoom call in about five days from there then, which is August 23rd.

Did that call happen?
A. It did.
Q. And what did you resolve at that point? Do you recall?
A. I remember that it was a productive call, and I remember that at this time there had been a lot of turnover in Spalding. New elections director. I believe several members of their board were new, and so we wanted to get an understanding of their concerns. And I remember that it was a good call and that we came out of it with the next steps to move forward.

What those specific steps were, I don't recall.
Q. Okay. And your communications with Ms. Slaughter began with a bold -- a directive in bold lettering, do not allow an IT company to image or conduct any activity on voting equipment. That is not allowed.

```
And am I correct that that was Sullivan -- what is the last name?
MR. FISHER: Strickler. SullivanStrickler.
BY THE COURT:
Q. -- SullivanStrickler they wanted to hire?
A. That seems to be my memory as well.
Q. So what was your knowledge at that point in August of 2021 that it would be -- about SullivanStrickler that would -- and being involved in any imaging or activity related to voting equipment that led you to place this in such -- in bold and underlined that warning?
```

A. In August of 2021, I don't think -- I don't think that I knew anything specifically about Sullivan and Strickler, but I knew that the action that they were talking about doing was wrong and should not occur, which is why I stressed it to the point that $I$ did in my email.
Q. Did you ever find out what was wrong with their equipment that they were complaining about or the software in it that was being run?
A. I remember from talking to Ms. Slaughter that when they took over -- I say they. When she came in as the new elections director, $I$ don't believe the previous director left on good terms. So there wasn't a good handoff of procedures, passwords, and that sort of thing.

And it would be helpful -- seeing this email thread -- I
referenced even in my email additional emails, including an email that Ms. Slaughter helped. That would be helpful to be able to see that original one.
Q. It would be helpful to what?
A. To be able to see that original email from Ms. Slaughter. And I think that might spur my memory a little bit, but -Q. Yeah, I don't have it. I mean, it is not what I -- in my possession at this point or that has been presented.

But if you look at the letter from -- that you wrote to her, because I think that was a concern at the time, and your letter at 9:08 A.M. on August 18, 2021, first of all, you attach the -- an election board rule and -- saying equipment modification has to be authorized by the Secretary of State.

But this is what -- second, please, send me a written explanation of your concerns. Since the equipment you have stored is State-owned equipment, we must follow protocols to examine the equipment to detect possible issues.

So it seems like when $I$ read that that you didn't have a written explanation at that point that you were dealing with this.
A. Yeah. Yes, Your Honor. I think they had concerns, and what I -- from what you just read, what I was asking her to do was put those concerns in writing so we can proceed in this way.
Q. I guess, ultimately, my question is this, is that the
equipment was replaced. We're not sure where it went to after that.

But as in May or June of 2021 in Coffee County, there doesn't seem to have ever been any analysis of the computers or the software afterwards to determine what was wrong or what might be wrong; is that right?
A. In Spalding County?
Q. Spalding or Coffee.

I'm talking back in '21. I'm not talking about what might have been done later.
A. Correct. So as of this time, I believe you would be correct.

THE COURT: All right. Thank you very much. It is a challenging job to be director of elections.

THE WITNESS: Thank you, Your Honor.
THE COURT: All right. Thank you for your service and being here.

Anything occasioned by my questions?
MR. TYSON: I have no questions, Your Honor.
MR. CROSS: No questions, Your Honor.
MR. McGUIRE: None from us.
MR. OLES: Nothing further, Judge.
THE COURT: Looks like you are liberated.
THE WITNESS: Thank you.
THE COURT: Take a deep breath and go home if you
can. Thank you.
MR. MILLER: Your Honor, the State is now going to call Joseph Kirk.

I do want to note a couple of things based off some questions. It's not really something to spend a ton of time on.

THE COURT: I think Harry has something against you.
MR. MILLER: I don't blame him for that. I just want
to note a couple of things based on some of the questions. I think there was a question by counsel implying about production of these forms. I just want to note that --

THE COURT: Which forms?
MR. MILLER: The polling place forms that we were going through. And I just started looking for a couple while we were here. And the voting equipment exception report can be found at State Defendants' 129691, polling pad recap form can be found at State Defendants' 129428 --

MR. CROSS: Your Honor, I can help.
THE COURT: Wait a second.
MR. CROSS: I can help. I may not have asked it clearly. I meant they had not been produced in evidence at the trial. That is what $I$ was trying to make a point. They are not in evidence. That was my only point.

MR. MILLER: If they are not in evidence, I'm not
really sure what the relevance of that question is --

$K-I-R-K$.
Whereupon,
JOSEPH KIRK, after having been first duly sworn, testified as follows: DIRECT EXAMINATION

BY MR. MILLER:
Q. Mr. Kirk, good afternoon.
A. Afternoon.
Q. Thank you for joining us today.

Mr. Kirk, could you describe to the Court your current employment.
A. I am the elections supervisor for Bartow County, Georgia, which means I'm the secretary of the local board of elections as well the department head to take care of the day-to-day office matters.
Q. Thank you, Mr. Kirk.

And I -- for the benefit of Ms. Welch, I know being on the stand can be a little intimidating and get you nervous, but it is important for the record that we try and speak slowly and clearly today. Okay?
A. Absolutely.

That is a failure of mine. So please, if I go too fast, tell me.
Q. So, Mr. Kirk, just to be clear, who hired you?
A. I was selected by the Bartow County Board of Elections \&

Voter Registration and then hired by the county commissioner.
Q. Okay. And to your understanding, does the Secretary of State have any involvement in your hiring?
A. Not at all.
Q. And the State Election Board?
A. Nope.
Q. So to step back a little bit, I want to talk kind of about your background because I understand you have been in and around elections for a long period of time.
A. That's correct.
Q. So let's start with college.

Where did you go to school?
A. The University of Georgia.
Q. And did you graduate with a degree from UGA?
A. I did. In computer science.
Q. And, Mr. Kirk, following your time at the University of Georgia, what did you do for work?
A. Well, if $I$ can step back a little bit, while $I$ was at the University of Georgia, I worked for the Center for Elections Systems at Kennesaw State University helping to implement and test the statewide DRE system.

And then I used that experience and went to the Secretary of State's office in Mississippi where I implemented their statewide system from 2005 to 2007.
Q. Okay. And what was your title with the State of

## Mississippi?

A. I believe it was more of a description, support and training.

THE COURT: Support and what?
THE WITNESS: Training.
THE COURT: Training.
BY MR. MILLER:
Q. So -- and this may be a simplistic understanding of that title.

So support and training, that was supporting implementation and training on the machines or something?
A. Yes. My actual job duties were to work with the vendor to -- and my colleagues to write the procedures for vote booth testing as well as how it will be used in the field. And the work product was a manual for step by step how to conduct an election in Mississippi with that statewide voting system.
Q. Okay.
A. And I also trained the officials directly.
Q. Okay. And I believe you said that was 2005 to 2007?
A. That's correct.
Q. Okay.

THE COURT: What was the system?
THE WITNESS: It was the AccuVote TSX voting system with the voter-verified paper audit trail attached.

BY MR. MILLER:
Q. So can you describe to the Court -- I know the Court is familiar with the AccuVote DRE system that was previously used in Georgia.
A. Uh-huh (affirmative).
Q. Can you describe to the Court any differences and similarities between that and the Mississippi system?
A. It was -- I'm not sure if the software version was the same, but the hardware was the same with the one exception that in Mississippi we had a device that fit on to the printer of the TSX tablet that would print out the voters' selections for every voter that voted rather than just the summary results at the end.
Q. Okay. And to clarify those, I understand voter verifiable paper audit trail is a bit of a term of art, but that is not a ballot; right?
A. No.
Q. Okay.

MR. CROSS: Objection. Leading.
BY MR. MILLER:
Q. Can you describe what you mean by the term of art, voter verifiable paper audit trail?
A. Absolutely. When the voter entered the voting compartment, they would put their voter access card into the machine and then mark their selections on the screen of the

DRE. At the end of that process, they had a summary screen where they would verify their selections on the screen and then they would choose to print their selections, and those selections were held behind a plastic panel so they could not touch them, but they could look at the piece of paper and verify that those selections matched the selections on the screen that they made while they were voting.

And as long as they matched, they could cast their ballot, in which case that was the audit trail of record; if not, they could go back, remark their ballot, and print it again.
Q. Okay. And so following your time in Mississippi, where were you next employed?
A. After I left Mississippi, I started as the election supervisor in Bartow County October 1st of 2007.
Q. Okay. So you have been election supervisor ever since October 1, 2007?
A. That's correct.
Q. Do you serve on any national groups or boards concerning elections?
A. I do. I currently serve on the advisory board for the Election Official Legal Defense Network, the Bipartisan Policy Centers Election Task Force. I am involved with the Election Center, which is a National Association for Election Officials, as well as other groups that $I$ work with, such as, like I say, the Brennan Center and folks like that.

THE COURT: What is the Election Office [sic] Legal Defense Network?

THE WITNESS: We provide pro bono counsel to any election official who needs it in performance of their duties and also help with communications efforts.

I'm sorry. I left one off the list.
I'm also a member of the Election Verification
Network, which is academics and researchers talking about evidence-based elections.

BY MR. MILLER:
Q. Are there any familiar faces in the room that are involved in any of those groups with you?
A. Yes. I see at least one who is a member of the Election Verification Network, but I'm not familiar with every single one of the members, and I'm bad with faces too.
Q. Okay. And who is the one that you see?
A. Marilyn Marks.
Q. Okay. Are you familiar with the name Alex Halderman?
A. I am.
Q. And how are you familiar with that name?
A. Through that organization, I have seen him and spoke with him at the annual conference.
Q. What about Philip Stark? Are you familiar with that name?
A. I am. I have met with him virtually, I believe, once, but never had a chance to meet him personally at the conference.
Q. And you say at the conference?
A. Both members of the EVN. THE COURT: Of?

THE WITNESS: The Election Verification Network.
BY MR. MILLER:
Q. EVN?
A. EVN.
Q. What about at the State level? Do you serve on any boards or councils regarding elections?
A. I'm the president-elect for the Georgia Association of Voter Registration and Election Officials, which is a statewide organization for my profession.
Q. And the Georgia Association of Voter Registration and Election Officials -- which I understand is colloquially referred to as GAVREO --
A. That's correct.
Q. -- what kind of programs or events or communications does GAVREO put on as part of its duties?
A. The main thing that we do and the purpose we were created for is an annual training conference that maintains the election officials' election certification for the State.
Q. Okay. And at that election -- well, let me back up a little bit.

You referred to election officials certification for the State.

Can you describe to me in general terms what you mean by that?
A. Every county needs at least one election official who has been certified by the Secretary of state to conduct elections to legally conduct those elect.

Ions. The initial certification currently is done online through the Secretary of State's office. I believe it is a 12-module course.

And afterwards, the continuing education is normally handled through our annual training conference -- GAVREO's annual training conference.
Q. Okay. So at the initial certification, is there a test or something like that?
A. There are -- it is has been awhile since I have gone through this, but I believe there is a quiz at the end of each module to demonstrate proficiency in that topic.
Q. Okay. And then, you know, you spoke about training at GAVREO.

Are those conferences generally election superintendents like yourselves, or are there other folks involved?
A. Everyone at the conference is an election official. Some counties choose to bring their entire staff with them. Some counties choose to send, say, the supervisors and the election board.

In my case, it is normally myself and my assistant
department head that go to the annual conference.
Q. Okay. And with respect to kind of training more generally, who is responsible for training the poll workers that, for example, work under your office?
A. Me. Poll worker training is a county responsibility, and we all do it slightly differently. But in my case, I do most of it personally.
Q. Okay. And so let's talk about some of the training subjects that may occur at GAVREO.
A. Uh-huh (affirmative).
Q. I'm not asking for an encyclopedic knowledge of every conference you have attended.

But, you know, in terms of the types of training that are put on there, can you describe some of that to me?
A. In general terms, we try to prepare our members for the upcoming election year. That could be instruction on things like absentee balloting or qualifying procedures, voter registration topics.

At a recent conference, we branched out and actually taught stuff about deescalation, active shooter training. We also do a legislative update to know what the new laws are, how to anticipate those, and we have also taught classes on post election audits.
Q. And now, have you personally put on training at those conferences?
A. I have.
Q. And in what subjects?
A. Audits come to mind. I think I taught a training class on that twice. And then my latest class involved the voting system itself, the maintenance, the -- how, you know -interaction with open records laws, things like that.
Q. And so let's -- you mentioned audits.

What kind of training were you putting on for audits? Can you describe it to me?
A. Well, we were trying to teach them how they were going to conduct a risk-limiting audit after the election, how to prepare for it, how to create what is called a ballot manifest, the sort of index of what really the ballots are, where they came from, how that leads into the auditing procedure. The nuts and bolts of how their folks will actually conduct the audit, as well as how the results will be reported afterwards. Q. We'll come back to the topic of audits, but $I$ want to talk a little bit about step by step through a running an election. Okay?
A. Okay.
Q. So when preparing for an election, can you describe to me some of the processes that you and your office go through in setting up the polls for in-person voting?
A. Specifically how we set up the polls for in-person voting or how we get ready to do that?
Q. Let's do that. Let's start from the beginning.

How do you get ready to do that?
A. So it all starts with creating the ballots, creating the databases, which is done by the Secretary of State's office. We have a part in that of proofing and a testing process we go through afterwards called logic and accuracy testing where we're ensuring the hardware operates properly, tabulates accurately, and makes sure that the results get reported accurately in the State's ENR system or election night reporting system works.

Once we get through that testing process, everything is sealed up until it is used in an actual polling place. We're also packing supplies --

THE COURT: Could I just stop you for a second. The first thing we're talking about is the -creating the ballots and then creating the database, which is done by the Secretary of State's office.

THE WITNESS: I apologize. That was a misspeak on my part. It is the same thing. THE COURT: It is the same thing?

THE WITNESS: Yes.
THE COURT: So the first part is obviously creating the ballots which the Secretary of State prepares for you, and then you do logic and accuracy testing? THE WITNESS: That's correct.

THE COURT: All right. But you're not creating the database? You're just -THE WITNESS: No. Uh-uh (negative). I apologize.

Yes.
THE COURT: That's all right.
BY MR. MILLER:
Q. So just to back up, the ballot is created by the Secretary of State's office; right?
A. Well, to be accurate as I can be, they create the Dominion database that produces the ballots.
Q. Okay.
A. Once I proof the ballots from that database, example ballots and some reports about where the ballots will go and who receives them and sign off on it, then the print files are sent to my print vendor for them to print the ballots.

And then once we get -- and those would be hand-marked ballots. Once we get those in, we enter into the testing process with those printed ballots.

The other way a ballot is generated is through a ballot-marking device, and we test the production of those ballots during logic and accuracy testing.
Q. Okay. And so talking about that database file, you mentioned something called proofing.

So are you receiving it and reviewing it and then
something else, or --
A. They distribute certain files to me ahead of time. Ballot proofs that they generate out of the database, they still have, along with reports such as, you know, what districts are included on each ballot, what precincts those ballots will appear in.

And once I sign off and say that information is correct is when $I$ actually have the database in hand. That is when they send it to me.
Q. Okay. So in that proofing process, you're checking that it is the right names, for example?
A. The right names. The right order. Are they spelled correctly? And I think, most importantly, is there a proper ballot style for every area of these in my county? Is there a collection of races that is going to be assigned to that precinct for the voters who need to vote that set of races?
Q. And I think you just began explaining there.

But can you explain to the court what you mean by ballot style?
A. Absolutely. If you think about an overhead projector back when we still used those and if you had a sheet for every type of district in the county, say, state house, state senate, school board, and you put them all on top of each other, every little box would be what we call a district combination. And that's --

THE COURT: Every little box would be what?

```
THE WITNESS: A district combination. In Georgia, that's a three-digit code. And it indicates a set of races that would be displayed to those voters.
And then when you -- that set of races from the district combination becomes what we call a ballot style. And one ballot style can be assigned to more than one location, but it really has to do with the races that are displayed on that ballot.
BY MR. MILLER:
Q. All right. So we talked about ballot proofing. You began to talk about logic and accuracy testing.
Can you describe to me how you carry that out?
```

A. Absolutely.

In most cases, it is my staff that carries it out. But this a public process where we go through, and we'll frankly make sure there are no surprises on election morning or when advanced voting starts.

We set up all the equipment, turn it on, verify the software version. On the ballot-marking -- program the machines -- the devices as part of this process using the database to transfer that information either through a PCMCIA memory card or a USB drive for the tablets themselves.

And then my staff makes sure that the right ballots are displayed. That when they mark a name on that ballot, that ballot actually prints out with the name on it. And this is
talking about the ballot-marking devices themselves.
Once they print all of the different ballots for -- for that precinct, it creates what we call a test deck. Then they go to a -- the newly programmed scanner that is going to be assigned to that precinct or polling place and scan through that entire test deck to be sure it tabulates everything properly.

When we do that, we also scan through a test deck that is generated by the ballot printer with a certain selection on it prefilled for us, as well as at least one ballot from the actual printed ballots will be used for the voters to be sure all that scans accurately.

At the end of that process, those results are transferred to the central server -- it is called a results tallying reporting system -- to verify that it is reporting results accurately.

And eventually, the results are exported from that system and uploaded to the State's election night reporting system to be sure that transfer happens properly.

THE COURT: Can we stop for just a second?
(There was a brief pause in the proceedings.)
THE COURT: You're speaking faster than you would know, but it is also because you know all the words you are going to say.

MR. MILER: You were doing pretty well until right
there at the end.
THE WITNESS: Yes. If you need to like throw
something at me, just throw it.
(There was a brief pause in the proceedings.)
THE COURT: Let's take a ten-minute break. COURTROOM SECURITY OFFICER: All rise.
(A brief break was taken at 2:55 PM.)
THE COURT: Have a seat.
BY MR. MILLER:
Q. Okay. Mr. Kirk, before we took a short break, we were talking about preparing for running an election; right?
A. (Witness nods head affirmatively.)
Q. And I believe the step that we left off on was after logic and accuracy testing.

Was I correct on that?
A. I believe I had just finished talking about logic and accuracy, yes.
Q. Okay. All right. So timeline-wise, you were preparing for advanced in-person and absentee voting right at this point; right?
A. That is correct, as well as probably packing supplies for election day.
Q. Okay. And how many advanced voting locations are in Bartow County?
A. It depends the election. But for most large elections, a
total of four, one for the entire period and three additional locations the final week.
Q. And what is the period of advanced in-person voting?
A. It begins the fourth Monday prior to an election and ends the Friday prior to the election and includes two Saturdays in that period for a total of 17 days.
Q. Okay. And when do you begin sending out absentee ballots?
A. Right at a month before the election.
Q. Okay.
A. Well, there's one set that goes out for what is called UOCAVA voters, Uniformed and Overseas Citizens Absentee Voting Act, and that happens 45 days prior to the election. But the ballots for most voters go out about a month before the election.
Q. Mr. Kirk, I should probably back up a little bit because I think we've got some folks here that are from out of state.

But can you describe where Bartow County is located?
A. It is about an hour north of $I-75$ from here.
Q. And do you have a sense of the number of registered voters in Bartow County?
A. We currently have, I believe, around 75,000 active registered voters and less than 10,000 inactive registered voters.
Q. Okay. Relative to some other counties in Georgia and the size of their registered voter population, where does Bartow
fit in the mix?
A. We are considered a medium-sized county.
Q. Okay. So --

THE COURT: I'm sorry. You have 75,000 active
registered voters, more or less, and how many people voted in the last State election?

THE WITNESS: I think it was around 40,000.
I normally have to look up statistics to give good numbers. BY MR. MILLER:
Q. Yeah. And we're just looking for a general sense here. I realize you don't have your setup in the elections office right here in front of you.

And so it would be accurate to describe Bartow as a suburban county?
A. It depends where you are in the county.
Q. Okay.
A. We still have a lot of rural areas. Our commissioner, I think, still raises cattle. But there are places that would definitely be suburban.
Q. Okay. So back to the election day -- or excuse me -election preparation process, can you describe to me the processes involved in opening the polls for in-person voting?
A. Absolutely. I think the first step there would be to set up the location. One of the locations in my -- is in my
office. That is fairly simple. We leave it mostly set up with signs on the wall year-round.

The other ones we have to go in, prepare the facility, set up tables, chairs, put signs on the walls in the proper places, and then deliver the voting equipment from our secure storage space to those locations.

And what we normally do is set up ballot-marking devices at least by the day before the facility opens and deliver the scanner, which remains sealed until they use it on -- for voting the day they open.

And that way -- well, the goal is for the poll manager and their employees to have to do as little as possible when they show up on the morning of voting. Because things tend to go wrong and you want to be able to pivot in case something happens before voting opens.
Q. Okay. You talked about seals.

Can you describe some of the seals you are referring to?
A. Yes. So during logic and accuracy testing, we put seals on key areas of the equipment. And in the case of the ballot-marking device, there are seals that the State puts on that we never remove. And then there are other seals that we put on during testing. One of which the poll workers have to remove to turn the machine on.

On the scanner -- the in-person scanner that we use, there are seals on the compartments that contain the memory cards
that we put on during L\&A testing. There is a seal on the accessories compartment on the side that is put on by the State. And then the entire thing is sealed up with a big lid on top of it so you can't access the scanner at all without breaking the seal on the ballot box.

When they open the polls, either for advanced voting or on election day, they are required to verify every single one of those seals before they break any of them and are required to notify me if anything doesn't match before they proceed.

And then on the ballot-marking device, the ICX, they break a seal on the power printer compartment where the power button is located, turn the machine on, and then reseal that compartment. That seal is not broken again during the day unless there is some reason we have to reboot the machine.

On the scanner itself, they don't break -- they break the seals on the ballot box on the lid, but not on the scanner until the very end of the day when they are closing.
Q. Okay. And I think you mentioned a couple of times comparing seals in your testimony there.

Is this process documented in any way?
A. Yes. I use my own forms for this, but we record the seal numbers during logic and accuracy testing. I transfer that information to the forms they will use on election day or during advanced voting.

And then I require it to be at least a two-person process.

One person reads the numbers while somebody else verifies the numbers, and they are required to initial the form to take personal responsibility that they verified those numbers. THE COURT: Can you just tell me -- because we're going with great particularity and detail -- and I appreciate that.

But is this uniquely your process, or is this basically you are describing what is the approved State process for going through this?

Because I'm -- you know, if it is just what you, as a very obviously highly professional person does, it doesn't tell me that -- I mean, it tells me you are doing a great job. But it might not be -- tell me what anyone else is doing.

And on the other side of it, if we're just repeating what we have done in your introduction of the -- Counsel, in your introduction of information via the Secure the Vote poll worker manual, then why would I be going through all that again? Why wouldn't it be just redundant?

MR. MILLER: I apologize, Your Honor. I was asking my co-counsel for a note real quick.

What was that?
THE COURT: Okay. So my question is this: We have got -- obviously have a highly professional chief of election division -- I know chief is not the right word, but -- here from Bartow County, and he is going through a process about
talking about the seals and the voting equipment, et cetera.
We have already gone through the poll worker manual description, so I'm just trying to get -- find out, are we -is this redundant? Is this uniquely his? Is this his elaboration of what best practices are, but -- which a variety of counties may or may not do other than supposedly following the poll worker manual.

I just need some clarity because we're going with such granularity about this. And I mean, no reason to doubt anything of the professionalism of the witness, but it doesn't necessarily tell me that that is what everyone else is doing.

MR. MILLER: I see, Your Honor. And I think the answer is a little bit of both, and I think I can get to just a couple of questions right here that will bring that out before we proceed further.

THE COURT: Okay. Because I'm looking at the time, and we do -- I don't want to have to drag this witness back, and at the same time, I do not think that it would be fair to the court reporter to go much past 5:00 today given what she has been producing at midnight to you-all.

MR. MILLER: I'm going to knock on wood that we are out before 5:00, but I better go ahead and --

THE COURT: But we have another matter to deal with still.

MR. MILLER: Okay.

BY MR. MILLER:
Q. Mr. Kirk, those processes you referred to, do you have any understanding as to if there are statewide minimum requirements that reflect those processes?
A. Yes, and I believe the manual that Judge Totenberg referred to indicates those minimum standards. Everyone should be, you know, requiring seal comparison. Everyone should have certain chain of custody steps in place. The forms for the procedures are uniquely mine that I'm describing.
Q. Okay. And so to clarify there, you mentioned that you use your own forms.

Did I hear that right?
A. That's correct.
Q. Okay. Am I understanding you correctly that the forms are intended to reflect a requirement of State law or regulation?
A. Yes. The information in that report, everything they need is there. The way $I$ report it is a little bit different to streamline it for my employees.
Q. Okay. So, Mr. Kirk, without attempting to get redundant here, I'm going to kind of skip past the voting process temporarily and talk about the closing of the polls. Okay?
A. Yes.
Q. So when you close the polls for an election day, is there any comparison between the voters who checked in and the ballots that were cast?
A. Yes. That is one of the key parts of the process. We want to compare how many voters we checked in, how many folks should have been issued a ballot to how many received and how many we reported. And that is done through the forms I described.
Q. Okay. And similar to before, those forms you described, that is a practice that is reflected in a statewide regulation; right?
A. Yes.
Q. Okay. So in the scenario where -- strike that.

Let's say at the close of polls you had more ballots than the number of folks checked in.

What would you do?
A. What I trained my poll workers to do at that point in the process, because there's so much going on at that point. Is to do their best to try to explain what happened. If they cannot, then they are to seal everything up, bring it back to the office, and either I investigate it or meet with them to help -- have them help me investigate it in the days following the election.
Q. And if you couldn't get to a simple explanation, what is the next step?
A. Well, the end result of my work after the election is to report everything to my board who certifies the results; report the good, the bad, the what could have gone better; and then
they choose to certify or not. We -- and then we report anything we need to to the proper authorities.
Q. Okay. So at the risk of not repeating kind of some of the election day processes, let's talk about post election and more specifically with respect to post election auditing.

There has been some -- or let me back up.
Have you conducted a risk-limiting audit in your role as elections director of Bartow County?
A. Oh, yes.
Q. And was that a part of the statewide risk-limiting audit, or an additional audit you put on, or both?
A. It would depend the election. I have audited every election I have conducted since 2019 with the exception of the 2020 general primary because that was just a weird time. But every election since I have audited. And the audit that I conduct normally is a risk-limiting audit on steroids. I choose to go beyond the batches to be selected for an RLA and just audit all the batches.

So I do a full hand tally of a single race for every election I conduct.
Q. And describe to me how you carry that out.

It is not only you personally; right?
A. No, it is not. For a -- we'll say a big election --

MS. KAISER: Your Honor, just to interject, we don't see the relevance here. He has already testified that this is
atypical practice across the State and something that he just independently does on his own.

MR. MILLER: That is not exactly what he said. He said he participates in both the statewide risk-limiting audit and does additional audits himself.

And, Your Honor, if we don't want to hear from the folks carrying this out on boots on the ground, then we can move on.

THE COURT: I know, but it would be helpful to hear what a comparison of his -- his audit on steroids, as described, versus the State audit. I can process that would -might be useful. But I don't -- but just it would be better than having to have to learn all over again about the State audit that has been described or alternatively --

THE WITNESS: May I add one thing?
THE COURT: Yes. Yes. Go ahead.
THE WITNESS: There are other counties following my example now. I'm not sure how many, but I know that some of my surrounding counties will be doing this this year, and I suspect others will as well.

THE COURT: Well, that is great, but I just -- I don't know that we understand the scope of the population, et cetera, so -- but you're welcome to focus in on what are the -- what makes his auditing -- obviously, the witness believes and based on his experience and expertise that his
auditing is more extensive, so that might be useful to understand.

MR. MILLER: Your Honor, that is what I'm trying to get at. I think it starts from a baseline of what is part of the statewide audit and then what turns into --

THE COURT: We already had a lot of testimony
about -- about the statewide audit, I thought.
MR. MILLER: I do need to cover one aspect.
THE COURT: If there is some dimension you feel like
you need to cover, that is fine.
MR. MILLER: Okay.
THE COURT: But I'm just trying to get out what is
useful without our drowning.
MR. MILLER: Okay.
BY MR. MILLER:
Q. So, Mr. Kirk, with respect to the statewide audit, the Court has already heard some testimony about, you know, what Arlo is, how the manifest works, et cetera.

When you are conducting your audit on steroids, as you referred to it, how does that work in relation to what is going on with the statewide audit?
A. So the elections that have a statewide audit component, I normally choose the race that is part of the statewide audit. My goal in my audits is to address the concerns of my community, and I try to select a race that they are concerned
about.
And in each statewide audit so far, the race selected by the Secretary of State's office has coincided with my community's concerns. So I start with their batches and then just do the rest of them.
Q. Okay. So you say you start with their batches.

I'm probably oversimplifying it, but say they tell Bartow County you're pulling two batches?
A. Uh-huh (affirmative).
Q. What else do you do from there?

THE COURT: Two batches for sample -- as samples?
THE WITNESS: Uh-huh (affirmative). Those would be the batches selected by Arlo. But my day starts out for my audits by transporting every single sealed ballot container to an off-site auditing location that's large enough for the public to observe.

So all the ballots are there. All the polling containers are there. All the batches are there. And once we've audited the batches the State selected -- or sometimes we do a few others first and then get to theirs because it works better for the process -- we just keep checking them out to my auditing teams and -- until we have audited everything. BY MR. MILLER:
Q. And everything, you -- do you mean literally every ballot?
A. Every single one.

THE COURT: Every single ballot in the batch, or every single ballot that was cast in the county?

THE WITNESS: It would always be every single ballot in the batch because you want to compare the totals for the report by the voting system for the batch to the hand count during the audit.

I choose to audit every single batch. So every single ballot cast in the election: Absentee, advanced voting, election day, provisional, all.

THE COURT: But that doesn't represent all of the entire voting population, does it?

THE WITNESS: For that election, for that county.
THE COURT: For the county?
That is what I'm just trying -- this is just like a communication issue between us.

Is it you're seeking to review every ballot that was cast in the county?

THE WITNESS: If the voting turnout was 40,000
voters, I would audit 40,000 ballots.
THE COURT: All right. And so what does it mean to be -- then be auditing just the batches selected by Arlo versus what you are doing?

THE WITNESS: Normally, Arlo selects a very small number of batches. The risk-limiting audit formula is very efficient.

And you can -- in most elections, in my experience, especially statewide elections, we only need to audit a small number of batches, meaning every ballot cast through an in-person scanner or every time we scan a stack of ballots through the central scanner to hit the risk -- or to achieve the goal of the audit and have confidence in the results.

So if there's 40 batches, I may have two for the State that I report back to the State but I will audit all 40 of them.

THE COURT: All right. So you are doing the entire group, but you are only reporting to the State on your two that were the batches they identified?

THE WITNESS: That's correct. The way Arlo works from my end, I can only report those batches.

THE COURT: I see. I see. All right.
THE WITNESS: But I'm happy to share.
THE COURT: So the question $I$ have coming out of that is, Arlo, I guess, after 20 -- there were -- the picking of batches changed because, of course, in 2000 [sic], it was an -all ballots for the purposes of the State, but I gather in 2022, Arlo started using -- was identifying batches for you?

THE WITNESS: So originally, I piloted audits for the State in 2019. And when I did, we were looking at what is called a ballot polling audit where you select ballots at random to -- and it is -- I hate explaining ballot polling

```
audits.
```

But the key point here is that it is a random selection, and the closer the margin of victory, the more ballots you have to select.

THE COURT: Right.
THE WITNESS: It would have taken us longer to do a sampling of ballots in 2020 at random than just hand counting every single one of them.

THE COURT: Right.
THE WITNESS: Since then, we have changed the type of audit we do to a batch audit rather than a ballot polling audit. And in that case, a small number of batches is selected rather than a certain number of ballots that we would have had in 2020 had the margin not been so close.

BY MR. MILLER:
Q. So, Mr. Kirk, you mentioned you do this to instill
confidence in the voters in your county.
Did I hear that right?
A. Absolutely.
Q. Okay. Did something come up with voters in your county that caused you to feel you needed to instill that confidence?
A. It has always been my goal to increase public confidence in elections. It has always been my goal to be observed as I'm conducting an election and be as transparent as possible. And those efforts served me well when 2020 happened.

I was a little ahead of the curve, and I already had confidence from my community and had parties that supported me. And when people were calling me after that election asking how I knew their ballot was counted properly when there were a lot of allegations that, how do I know my vote for our presidential candidate went to the right place, I could explain very easily, I know that it happened because we checked. We checked every single ballot one at a time going through them with teams of two publicly. And the results, for the most part, matched. My audits always had a small margin of error, like .03 percent, so .003.

That explanation is very simple, and folks can understand it. I trust risk-limiting audits. I trust the math works. I don't want to explain the math.

So I find this small investment in time and resources pays off very well in the end because everyone understands what I'm doing and they have confidence as a result.
Q. And you mentioned before other counties in the State.

So have you spoken with other counties about these audits on steroids?
A. Absolutely. I point out that as they keep getting angry phone calls or folks coming to their board meetings with concerns, I don't have those same issues because I acted proactively and tried to get ahead of people's concerns. Not that I think there is actually a problem with the voting
system. But sometimes you need to show people what you are doing for them to trust it. And I encourage them to follow in my footsteps.
Q. And how has that encouragement been received, to your knowledge?
A. At first, not very well. But over time, people tried it, saw the benefits of it, and want to have that level of confidence in their communities.
Q. And does the Secretary of State or State Election Board prohibit you from what you are doing?
A. Not at all. In fact, I have received two awards now from the Secretary of State for what I do with audits.
Q. And I'm sorry.

Did you say you received two awards from the Secretary of State?
A. Yes.
Q. And can you describe that to me?
A. I received one award at a training conference in Athens, really about the voter registration system that was a little humorous, the most likely to conduct an audit.

But then yesterday, I actually received what is called an Eagle Award from the Secretary of State's office, which is a new thing this year to recognize excellence in innovation in elections.
Q. So does the Secretary or the State Election Board -- do
they encourage you doing these audits on steroids?
A. I don't know if encourage is the right word, but I think they are grateful. It is done -- I like to talk about this, if you can't tell. And going around talking about this has really, I think, helped with elections in Georgia.
Q. So, Mr. Kirk, I want to back up to just a couple of things that have come up elsewhere in this case and relative to how those operate in your county. Okay?

What is your understanding of the -- or any requirement for the provision of sample ballots at the polling place?
A. We are required to display publicly two sample ballots at every in-person voting location. That can be either the individual ballot styles that are assigned to that location or what is called a consolidated sample ballot that includes all the races available countywide.

I very much prefer to hand out the proper ballot style to voters so they know what to expect and encourage them to download it from their MyVoter page at the Secretary of State's office before they come, if they can. But occasionally, you do have to use consolidated ballots just to conserve resources and time.

We also have a supply of ballots there to hand out to voters. Whether that is during, you know, advanced voting or on election day, there are always sample ballots. If somebody wants to take one with them into the compartment or take it
home with them, they are more than welcome to.
Or what some folks do is actually print it off at home as a cheat sheet and to remind them how they want to vote, and they bring it in to vote with them.
Q. So in terms of being in the polling place, just out of curiosity, have you ever seen a voter walk in with a keyboard?
A. No.
Q. Can you describe to me how you set up your polling place relative to the machines how they are set up in the area?
A. Absolutely. The law talks about what is called the enclosed space, which is the space around the machines that you can only go into if you are a voter or on a very select list of people.

So when the voter enters, we want to funnel them to the check-in station first, but also have it configured to prevent access to the secure area of the polling place before they are checked in.

Once that happens that they enter the enclosed space, approach a machine, you know, put the card in, mark their ballot, print it, and then go to the scanner. And the scanner is positioned in a way where no one can get past the scanner and get out the door with their ballot because then it wouldn't be counted, but also to preserve the voter's privacy as they scan their ballot.
Q. Okay. Mr. Kirk, I want to ask you now a little bit about
the relief generally being sought in this case. Okay?
And I'm asking you this from the perspective of a local election administrator. Okay?

Do you understand in this case that the plaintiffs are seeking mandated use of hand-marked paper ballots?

MR. BROWN: Objection, Your Honor. That's a complete mischaracterization of the relief that we're seeking.

MR. MILLER: Okay. This will be helpful for me.
MR. BROWN: Your Honor, I move to strike.
BY MR. MILLER:
Q. Are you aware in this case that plaintiffs are seeking the use of both paper ballots and ballot-marking devices for in-person voters?
A. I have heard that. I have not read anything in the case in a while.
Q. Okay. From an administrative perspective, do you have any concerns with providing both hand-marked paper ballots and ballot-marking devices for the voters' choice?
A. I do. I refer to that as kind of the paper or plastic option, and it is sort of the worst of both worlds.
Q. How so?
A. Well, there's certain things you have to have in place for the ballot-marking devices, certain amount of space. You know, there's a certain amount of infrastructure that goes into the chain of custody and the forms that they fill out and how they
interact with those machines.
You need the same sorts of things for hand-marked paper ballots. You need a way to store them securely. You need a way to be sure that the voter gets the proper ballot based on their district combination that I described earlier.

And putting both infrastructures in place at the same time would require more employees, and it would be a hardship on my operation.

Not to mention that the only way I see a hand-marked voting solution operating properly, especially at an advanced voting site with multiple ballot styles, would be to have Ballot on Demand printers available that would hook up to the Poll Pads that check in the voters to print the ballot just for that voter at the time they check in to be sure they get the right one that we don't have. And we don't have time to put them in before in any reasonable amount of time.
Q. Those Ballot on Demand printers, do you have an understanding of what the cost of one of those is?
A. I do not. But in my experience, that type of technology is not cheap.
Q. I want to turn briefly to -- well, strike that.

MR. MILLER: Your Honor, if $I$ can confer real quick,
I think I can wrap this up now.
THE COURT: All right.
(There was a brief pause in the proceedings.)

BY MR. MILLER:
Q. Mr. Kirk, just briefly, similar to what we talked about before, you talked about providing sample ballots for voters; right?
A. Correct.
Q. And did I understand you correctly that you provide physical copies that the voters can take with them?
A. Yes.
Q. What about -- or do you have an understanding as to any State requirement for instructing voters to review their ballots?
A. There is a State requirement to -- that every voter prior to casting their ballot in person should be prompted to review that ballot. And when I train my poll workers on it, I tend to jump up and down and say, you will do this, or you are fired.

We need them to review their ballots in order for my audits to have any meaning.
Q. And from a practical perspective, how do your workers carry out that reminder to review ballots?
A. I require my employees to stay within basically an arm's distance of the scanner itself. So that is the most important thing in the room. That is where the voted ballots are.

And so they are standing there. They greet the voter as the voter approaches them with their ballot. And we have gone from saying, have you reviewed your ballot, to, would you
please review your ballot?
And most folks are happy to comply.
Q. I want to go back to one thing regarding the statewide risk-limiting audit, so different from your audit.

There has been some innuendo in this case that the statewide risk-limiting audits will no longer be required across the entire state.

Do you have any understanding of that?
A. If you are referring to what $I$ think you are to be the change in law and the term we're using to describe it, but the actual -- I have helped the State design the audit procedures. I've been the person doing all the training on those procedures.

The only true change in law is how many audits we're conducting, and we're increasing the number of audits we're conducting. Nothing in the procedures have changed.
Q. And how are you increasing the number? From what to what?
A. If my recollection is correct, it is we have gone from requiring a statewide audit for every statewide general election to every statewide election.
Q. And sitting here today, it is your understanding an audit -- at least one statewide audit will be conducted in this 2024 election cycle?
A. It is my understanding they will be doing an audit for the presidential preference primary, the general primary, and the
general election statewide at the very least.
Q. Mr. Kirk, I want to just kind of ask you briefly on a couple of general questions.

Do you take an oath for your position?
A. I did, yes.
Q. And do you take that oath seriously?
A. Absolutely.
Q. And in relation to taking that oath seriously, do you take responsibility for your poll workers seriously?
A. Absolutely.
Q. Mr. Kirk, with respect to your line of work in Bartow County, have things changed over the last several years relative to the attitude of the voters in your county?
A. In some cases, yes. I have a few that are very upset we're still using the same voting system. They are very vocal about it when they call me. They have never come to visit me in person.

And I've heard from my poll workers a general, say, distrust that as folks are coming in making offhand comments about the type of voting system we're using, you know, the -insinuating that our goal was to steal an election rather than conduct an election. And I have lost employees, I suspect, as a result. But $I$ never do exit interviews, so I don't know for sure.

MR. MILLER: Mr. Kirk, thank you for your service.

```
Your Honor, I'll reserve for redirect.
THE COURT: All right. Thank you.
```

                                    CROSS-EXAMINATION
    BY MR. BROWN:
Q. Good afternoon, Mr. Kirk. My name is Bruce Brown, and I represent the Coalition Plaintiffs in this case.

First, I think everyone here appreciates your good service to the State of Georgia and Bartow County.

And you testified that you had received some awards from the Secretary of State?
A. Uh-huh (affirmative).
Q. And I believe Secretary of State Raffensperger gave you an award yesterday; is that right?
A. That's correct.
Q. Could we get -- and is this a photo of the award that he gave you yesterday?
A. That is.
Q. And where physically were you when you got that award?
A. That is in my office.
Q. In Bartow County?
A. That's correct.
Q. So while we're down here trying the case, you were getting an award with Secretary Raffensperger. Congratulations.
A. And then I left that award to drive down here and see if I could testify. I was in the witness room right across the
hall.
Q. But seriously, the award that you got was being the best election administrator in the entire state; correct?
A. I don't believe so. I think it says for excellence in election administration. What he said when he gave it to me, I don't recall. But $I$ do appreciate his kind words.
Q. And your level of competence and rigor it's fair to say is way above average for Georgia; right?
A. There are things that $I$ do that other folks don't. But we have a lot of very talented election officials in the state of Georgia.
Q. In fact, many would consider you to be the most security-minded election official in Georgia; would you agree with that?
A. I -- people may have said that, yes.
Q. And you yourself personally have the skill to check the accuracy of the electronic database by examining the configuration of the files; right?
A. I'm not sure I understand your question.
Q. Well, I mean, you have a computer science background; right?
A. (Witness nods head affirmatively.) That's correct.
Q. You are unusually qualified and competent in managing the BMD election system; correct?
A. I see what you are getting at. But I don't feel the need
to go into state configuration files because my main goal is to focus on the accuracy of the paper ballots.
Q. Now, there are 159 counties in Georgia.

Fair to say that not all county election managers live up to the standards that you are capable to live up to; right?
A. In some cases, yes. But most of our security and I'll say the testing that we designed is focused on the accuracy of those paper ballots.
Q. Do you recall saying on Twitter or commenting on Twitter about Misty Hampton being hired by Treutlen County?
A. I do not. But if you could show it to me, I'm sure.
Q. Well, here we go. Let me show you what is on the screen now.

MR. MILLER: Your Honor, I'll just note an objection as to the scope of direct. This is impeachment or bias. It is a different story.

It is an objection as to exceeding the scope of direct. I'm not sure if this is an impeachment or bias line of questioning, but it didn't seem like it.

THE COURT: I think it is -- it is a kind impeachment.

THE WITNESS: I'm not sure what that means.
MR. BROWN: That is exactly what I intended, so that is good.

BY MR. BROWN:
Q. Mr. Kirk, do you see here this Tweet about Misty Hampton in Treutlen County? Do you see that?
A. I do.
Q. And is your understanding that after the Coffee County incident that we all know about, Treutlen County hired Misty Hampton to work in their election office?
A. That is my understanding.
Q. Do you know how Misty Hampton got credentials that she would need to have to work in Treutlen County?
A. I do not.
Q. And wouldn't she have to have some sort of credentials, either from the county or from the Secretary of State, to work there?
A. What do you mean by credentials? Are we talking about certifications or, like, access to the facility, using -- I'm not sure what you're --
Q. Open question.

What sort of credentials would she need to do the work that you understand she did in Treutlen County, if any?
A. She would need access to the equipment. She would need access to -- depending on what her duties were, possibly the State's voter registration system or to the voting system.

I'm not sure what the scope of her duties were there. I have never discussed it with her or anyone else in Treutlen

## County.

Q. But I mean, somebody off the street can't come into Treutlen County elections office and say, hey, I want to tinker around with the equipment; right?
A. Absolutely not. She would have to be granted access by somebody in the county.
Q. In the county?
A. (Witness nods head affirmatively.)
Q. And is there any mechanism that you're aware of from the Secretary of State or the board that would issue an alert or some kind of checking to see if a person like -- with Ms. Hampton's background would get jobs in county elections offices? Are you aware of anything like that?
A. I would hope the county would do a background check and do their due diligence. But beyond that, I do not know of anything.
Q. You're not aware of any statewide sort of rules that apply to that?
A. No.
Q. And you also remark here at the bottom of this Tweet, this also illustrates how few qualified election administrators are out there and how hard it can be to fill those positions.

Do you see that?
A. I do.
Q. And is that still your belief now?
A. I believe we have lost a lot of really good people in elections since 2020.
Q. And it is hard to hire good ones; right?
A. We've lost some good administrators since 2020, and not as many folks are entering the elections administration field.
Q. And it is hard to find qualified people; correct?
A. That is what I said, yes.
Q. You testified on direct about checking ballots or reviewing ballots after -- the BMD ballot card before it goes into the scanner.

Are you with me?
A. The ballot, yes.
Q. And it is important for the voter not just to check the ballot, but to actually verify it; right?
A. Would you mind telling me the difference.
Q. Well, do you know the difference?
A. That is what I'm asking. Check and verify, it is sort of the same thing.
Q. Well, check-- well, let me give you this.

Is it enough for a voter in a couple of seconds to just check, here's my ballot and scan it, or do they have to check to ensure that it is -- that all of the races and all of the questions are on the ballot and that all of the races and all of the questions match the way the voter actually intended to vote?
A. So, one, it depends on the size of the ballot. You know, the ballot we're about to use in March is going to have one name on it, one race, and $I$ believe they can check that pretty quickly if they showed up and they knew who they wanted to vote for.

As far as the rest of it, voters have -- you know, they know how they wanted to vote. They want to vote for all the Republicans, all the Democrats, the incumbents. They are checking to see if anything is left blank.

And $I$ believe they can do that fairly quickly.
Q. Now, in Bartow County, we'll have ballots with as many as several dozen different races and candidates on it; right?
A. Eventually, yes, especially if you're talking about the primary ballot where there might be party questions on there.
Q. I'm looking at some numbers that we have collected from Adairsville.

Adairsville is in Bartow County?
A. Yes.
Q. And Adairsville has about 7,500 voters as of November 2022, thereabouts?
A. That sounds about right.
Q. And it has about -- well, the note -- what we have, just to give you the order of magnitude here -- I'm not trying to pin you down for exact -- but for the purpose of my question about how lengthy the ballot is in general terms.

In November ' 22 , there were 26 races and questions.
Does that sound about right?
A. Approximately.
Q. In November ' 22 for the Democrat ballot, it was 31; right?
A. There wouldn't have been a Democrat ballot in November.
Q. I'm sorry. May '22 Democratic ballot. I misspoke. You are correct.

About 31 ballots?
A. Adding in some party-specific things, probably.
Q. May '22 Republican, 37?
A. The difference would be the party-specific races.
Q. Okay. Do you know of any human who can remember -- not -just remember 30 races from a ballot that they just cast on the screen?
A. I have always felt comfortable verifying my ballot.
(There was a brief pause in the proceedings.)

MR. MILLER: I'll state an objection here, first of all, as far as the scope of direct.

Second, this sounds awful like the scope of expert testimony that there was an objection to but then elicited anyway yesterday.

But it is certainly beyond what we talked about in direct.

MR. BROWN: I'll withdraw the question if it is confirmed that he didn't state any observations about people's

```
ability to read ballots during his direct.
```

    Is that correct?
    MR. MILLER: I think we just talked about the
    availability of sample ballots and things like that. I don't
recall that, so --

MR. BROWN: So there is no testimony then about whether his -- the voters in his county are able to read the ballot; is that correct?

THE COURT: I didn't hear any. Let me just put it that way.

MR. BROWN: Thank you. Thank you, Your Honor.
THE COURT: There was a lot of other testimony, but not specifically about that. And there was about the handing out the --

MR. BROWN: Thank you, Your Honor.
THE COURT: -- sample ballots.
BY MR. BROWN:
Q. Now, you have at least one BMD that is equipped to be used by voters who need assistance in every polling location; right?
A. Yes.
Q. And you don't let your BMD that is used for people who need assistance to just gather dust in the corner, do you?
A. I do not.
Q. Instead, it is tested, cleaned, and ready to use just like any other BMD come election day; right?
A. The only difference between it and any other BMD is that there is a special device attached for disabled voters to use should they need it because of dexterity or visual impairment. THE COURT: Because of what?

THE WITNESS: Dexterity issues or visual impairment. BY MR. BROWN:
Q. And, Mr. Kirk, in early -- in early voting, you are required by law to have a sufficient number of paper ballots for every ballot style; correct?
A. During advanced voting, my understanding is the only paper ballots they need at the polling place is -- are enough for provisional ballots, and they do have a full supply of those, and we usually go a little bit overboard to be sure they have plenty. And we can always run them more.
Q. Are you familiar with the poll worker manual?
A. I am.

MR. BROWN: Do we have another copy?
(There was a brief pause in the proceedings.) BY MR. BROWN:
Q. Now, don't the rules require you to have enough ballots to use paper ballots in case there is a problem with the BMDs?
A. My recollection is that is more of an election day rule, but I do have every ballot style available at every advanced voting site should they need it.
Q. Right. So you would be able to service your population in
early voting whether you had BMDs or hand-marked paper ballots; right?
A. We rely on the BMDs in the primary method, and that has been a good method for a while now. There is a sufficient number there to get them started, and then I have a full supply at my office that I can always take them if they need it. Q. But you would be ready to handle voters in early voting in your voting centers if the BMD went down first thing in the morning; right? You would be able to do it?
A. The technical answer is yes. The real world scenario would be: It would be a lot slower; we would have ballots issued to the wrong people; and just trying to balance that many ballot styles for precincts in a location, especially with a long line, would be problematic.
Q. And you would need -- it would be very helpful to get a Ballot on Demand printer in that instance, wouldn't it?
A. That is the only way $I$ think that would go well.
Q. But that would work; right?
A. Yes. Well, not just one; one for every Poll Pad checking in voters.
Q. Right. And that does cost money; correct?
A. Yes.
Q. How much does it cost you in hours to conduct logic and accuracy testing on each BMD machine?
A. Off the top of my head, I don't have a firm number for
you. I have a full-time staff member who leads that for me, and then we bring in temporary help as needed to help her out.
Q. But you would say --
A. How many hours that takes depends on the size of the ballot, the size of the election, whether it is a primary or not.

There's a lot of unknowns in that question.
Q. But in fairness, if you did not have to conduct logic and accuracy testing on every BMD, but instead had to conduct logic and accuracy testing on only one BMD per polling location, you would save a lot of time and money; fair enough?
A. I would save some time.

I'm not sure if a lot is the right word to use there.
Q. Now, you talked about training, and I was very impressed with the way you described your combination of hands-on work yourself but also training the people to work with you.

Your workers are trained to handle hand-marked paper ballots; correct?
A. Yes. A component of my training involves emergency procedures. It is specifically in -- I have a class for the voting system, meaning the ballot-marking devices and the scanners and a separate class for the Poll Pads and how the employees at those stations would have to pivot during -- if there is an emergency that requires us to make that change.

I start that part of the presentation by saying that
voting can slow down, voting can pause, but voting can never stop. But if this is to happen, we're going to support you however we can and have people out there to help you. And this is going to be -- this will possibly be slower. It will be more chaotic. But here is what we're transitioning to in an emergency, and that is expected during an emergency.
Q. But the poll workers know all the steps of how to handle voters coming in through a line and being given a hand-marked paper ballot and putting it in the scanner, et cetera; correct?
A. I relate it to our provisional ballot procedures, how we issue that ballot, how we make sure they get the right ballot style for that voter.

And in that case, they can. And -- yes.
Q. But they are trained to handle hand-marked paper ballots?
A. It is a small component of the training, yes.
Q. You testified about the way you set up machines in a polling location.

And I believe that Cartersville Civic Center is one of your polling locations; is that correct?
A. That's correct.

MR. BROWN: Could you show that.
BY MR. BROWN:
Q. And does this appear to be a photo of the Cartersville Civic Center?
A. I believe so.
Q. And that would be the unit for voters needing assistance?
A. That would be the unit for voters who need that -- that accessible device. Voters who need assistance could use any -any BMD because there is someone there assisting them.
Q. And in Cartersville Civic Center, the BMDs are -- the screens of the BMDs face the wall behind the voter; correct?
A. That's correct.
Q. And the screens of the BMDs are surrounded by the blue privacy shields; correct?
A. That is correct. We mostly use them for -- as a sign holder. We have additional privacy screens on the screen of the machines so that if people start moving around them or if somebody needs to move around the poll, their privacy is ensured beyond those blue panels.
Q. So if you are the poll worker that the voter would be facing, the poll worker, if you are six feet or so, could see the top of the voter's head, let's say, but the poll worker would not be able to see the body of the voter or the BMD or the printer; correct?
A. From the perspective this picture was taken from, yes. But there's other positions in the polling place where they would be able to see the full body of the voter.
Q. But the poll worker is not supposed to be able to see the screen; correct?
A. No. And that is the beauty of the one -- the additional

```
privacy panels that I have.
```

Q. Right.

THE COURT: It is the beauty of what?
THE WITNESS: The additional privacy panels that I have. They fit on the screen themselves too. So they can stand in front of it and really have a tight panel around them.

THE COURT: Is anyone else using the screens in your region that you know of?

THE WITNESS: Yes. I got the idea from Cobb County, and I think quite a few jurisdictions purchased them at the time.

There are machines I put out into the field on what are called Origami carts that have no blue panel around them at all.

COURT REPORTER: Please repeat.
THE WITNESS: They have no blue privacy panel around them at all. They just have that black thing attached to the screen, and that is to save space.

BY MR. BROWN:
Q. If you're the poll worker, you can't see the -- for example, the cable between the printer and the BMD; right?
A. Probably not from where they are from their positions.
Q. And a voter can pick which BMW -- BMW --

THE COURT: BMW.
THE WITNESS: I hope would so, if they're going to
pay for it.
MR. BROWN: Not this lawyer. Maybe one of these guys.

THE WITNESS: Definitely not me.
BY MR. BROWN:
Q. The voter can pick the BMD that they want to vote on; correct?
A. In most elections, yes. Sometimes they are so full that they have to pick whichever one is open.
Q. But a voter could pick one of the BMDs that has a printer cable that can't be seen by the poll watcher; right?
A. I suppose so.
Q. And is this --

MR. BROWN: Thank you, Tony.
BY MR. BROWN:
Q. Is this -- does this look like the Cartersville --
A. It may even be the same picture.
Q. I believe it is, yeah.

And that shows the orientation of the screens and the printers, which cannot be seen, at least, from where the photo was taken; correct?
A. Correct.
Q. And does this appear to be the configuration from last November 2023, if you know?
A. That, I don't remember. For machines, possibly.

MR. BROWN: Your Honor, we would like to mark this as
Coalition Exhibit 606 -- I'm sorry, 66.
THE COURT: 66?

MR. BROWN: Yes.
THE COURT: Any objections?
MR. MILLER: Your Honor, I think the only objection
would be to the extent Mr. Brown's questions are going to go to a specific date. That is what the witness couldn't testify.

So if we're just talking about this is a picture of a polling place, no objection.

MR. BROWN: Fair enough.
THE COURT: All right. Admitted with that
qualification.
But these are the blue screens currently being -- in
use and distributed?

THE WITNESS: Yes.

THE COURT: I mean, not the screens, but the
protective --
THE WITNESS: The privacy panels.
THE COURT: Right.

BY MR. BROWN:
Q. Now, you have seen photos of, for example, the State Farm Arena polling location in Fulton County?
A. Yes. I'm trying to remember -- I know I have seen them. I'm trying to remember them.
Q. And you would agree that they do not offer the same kind of privacy protection as your Cartersville Civic Center polling location does; right?
A. Is that where they use those big carts?
Q. I give up, but they are a long line of BMDs.

Do you recall that with people walking up and down behind them?

MR. MILLER: Your Honor, I'm going to object right here. We're going into speculation.

MR. BROWN: No. I'm asking for -- not for your speculation but for your personal observations.

MR. MILLER: He just said he didn't know. If he is
not sure what he is talking about, maybe --
THE COURT: Now you are testifying.
THE WITNESS: Possibly. If you have a picture, I
would love to see it.
BY MR. BROWN:
Q. That's all right.

Now, you testified on direct that you spoke with Dr. Alex
Halderman at an EVN conference last year.
Do you recall that?
A. I believe I spoke to him last year, yes.
Q. In that conversation, you told Dr. Halderman about an effort of some individuals to obtain unauthorized access to your county voting equipment; right?
A. I don't remember talking to him about that, but I do know what you are talking about.

COURT REPORTER: I'm sorry. Wait.
I remember talking to him?
THE WITNESS: I do not remember that being part of the conversation with Dr. Halderman, but I do -- I think I know what you are talking about.

BY MR. BROWN:
Q. And that effort occurred around the same time as the breaches of the State voting system in Coffee County in January 2021; correct?
A. I believe so.
Q. Did that effort involve some of the same people who were involved in the Coffee County breaches?
A. That, $I$ don't know.
Q. Who was it?
A. So I'll just tell you the story.
Q. Sure.
A. I got a call from my local Republican party chairperson asking me to conference in people that had contacted him with concerns about the election. They described to me wanting to come in and take images of the voting system itself.

I listened to them politely and then explained that that was entirely illegal and was never going to happen here. And that is where the conversation ended.
Q. And did you report this incident to the Secretary of State?
A. To the office, yes.
Q. Who did you report it to?
A. To the State election director.
Q. Chris Harvey?
A. I believe so, yes.
Q. And was that notification verbally or in writing?
A. I believe I called him immediately.
Q. And what did the -- what did the Secretary of State do to follow up on the information that you gave the Secretary of State?
A. I have no idea.
Q. Nothing as far as you know of; correct?
A. I was never part of those conversations. I reported it, but I was obscenely busy at the time and never followed up.
Q. Let me make sure the testimony is correct.

Your -- the call came after -- shortly after the
November 2020 election, to the best of your recommendation?
A. That is my recollection, yes. Where it happened in that time frame, I'm not sure.
Q. Who was the local party chairperson who contacted you?
A. Louis DeBroux.
Q. Louis DeBroux?
A. Louis DeBroux. And I cannot spell his last name.
Q. And was he a Democrat or Republican?
A. A Republican.
Q. Do you recall a notification from Chris Harvey that was sent to all elections directors in December of 2020 about people seeking unauthorized access to voting equipment?

MR. MILLER: Your Honor, I'll just note a brief objection. I didn't do it earlier, but we have gone well beyond the scope of the direct.

THE COURT: Well, you've had him talk all about his experience and the security of -- and what he does to secure the system. So I think it flows from that.

I mean, we're not going to go too deep, but I think these are fair game having opened this up as this is the -really one of the obviously leading folks in running elections in at least the county level in terms of his qualifications. Obviously not the largest county by any means though.

THE WITNESS: Thank you. I did not remember the
call, but --
BY MR. BROWN:
Q. Mr. Kirk, let me put on the screen in front of you

Exhibit 188, which is already in evidence.
Do you recall receiving that official election bulletin
from Chris Harvey?
A. I do. And my recollection is it wasn't so much what $I$ had reported, that kind of incident, as we were getting open
records requests for state election databases and addressing that concern.
Q. And if you remember, was the contact that was made to you by the local party official before or after you received this notice?
A. I do not. And it is worth noting, just to give him credit, as soon as I informed the people on the call it was illegal and I wouldn't do it, the local party chair backed me up 100 percent and I never heard from those folks again.
Q. He didn't push it?
A. No. He pushed them away from me.
Q. And you don't know who the --

THE COURT: When you say pushed them --
THE WITNESS: Yes.

THE COURT: Somebody else was on the phone with him?
THE WITNESS: It was a conference call between the
local party chair, me, and two or three people who described themselves as attorneys.

But as soon as I said, we're not doing that, Louis DeBroux said, absolutely not; if he says no, the answer is no. BY MR. BROWN:
Q. And those were attorneys?
A. My recollection was that it was attorneys, but I have no idea what their names were. I never recorded the phone number. I was moving so dang fast.

COURT REPORTER: I'm sorry. You were what?
THE WITNESS: I never recorded the phone number. I was just moving so dang fast trying to get ready for election stuff.

BY MR. BROWN:
Q. Now, do you know where the lawyers were from?
A. I do not.
Q. Just to close that loop, were there any other people who contacted you to try to make images of your election equipment?
A. No. Well, not that I recall.
Q. You also discussed some other horror stories about -involving security lapses with Dr. Halderman in other Georgia counties.

Are you aware of any of those?
A. That conversation happened a long time ago. If you care to --
Q. Do you remember any of those security lapses that you conveyed to him?
A. I do not.
Q. Was there any mention of -- in that conversation that we just referred to of SullivanStrickler?
A. From --
Q. The question was: There was someone who was going to come in to do the imaging.

Are you with me?
A. Yes.
Q. And you don't recall or maybe you didn't know who those people would have been.

But was the name SullivanStrickler mentioned in that conversation?
A. No. Because I -- I believe I know who you're talking about, but it is not a name that I actually know.
Q. How about Doug Logan or the Cyber Ninjas?
A. The only time I have ever talked about the Cyber Ninjas was how much of a -- well, I would like to say joke -- but poorly an audit that was in Arizona, from my understanding.
Q. Was Scott Hall involved in that call?
A. I'm not sure who that is.
Q. How about Robert Sinners? Are you familiar with that name?
A. I do know Robert Sinners. He was not on the call.

MR. BROWN: Your Honor, we're doing the best we can
to consolidate questions and go quickly without too much back-and forth.

So may I have a minute to --
THE COURT: Sure.
(There was a brief pause in the proceedings.)
BY MR. BROWN:
Q. Thank you for your patience.
A. Absolutely.
Q. Did you hear of the efforts -- efforts of individual to get into other counties other than Coffee County and Bartow County?
A. I do not recall any of that.
Q. Did you ever hear of Doug Logan or Lin Wood or SullivanStrickler trying to access DeKalb equipment?
A. No.
Q. Did you hear of anyone claiming to have access -- claiming to have access to a Ware County voting machine?
A. That rings a bell, but $I$ can't remember anything about it. Just the name Ware County just strikes -- rings something.
Q. Rings a suspicious bell?
A. Well, I won't say a suspicious bell, but, you know, something -- there was something about a claim about Ware County. I just don't remember what it was.
Q. Ware County? Something strange? Sort of those two things come together?
A. Maybe.
Q. But you don't recall any details about that?
A. No.
Q. Getting back to the overture that was made to you --
A. Uh-huh (affirmative).
Q. -- did you report that to the IIRC?
A. What is the IIRC?
Q. I'm not sure. It is an agency.

Do you recall reporting it to them?
THE COURT: No one can take down if they are
laughing, and I didn't appreciate the laughing.
MR. BROWN: It is a fair question.
THE COURT: It is. It is just we have to hear it.
That's all.
BY MR. BROWN:
Q. Are you not familiar with an agency called the IIRC?
A. I deal with a lot of acronyms.

Do you know what it stands for?
Q. I do not. It is not Bavarian Motor Works or ballot-marking device. I do know that.
A. No. That's fair.

So I'm fairly certain no, I did not.
Q. Did you report it to any federal -- I'm not suggesting you should have. I'm just trying to get the fact --
A. No. The only person $I$ reported it to officially was the State election director.
Q. Did you tell other counties about that or county election officials?
A. I assume so.
Q. But you don't have any specific recollection?
A. No.
Q. You testified about the proposed solution that the plaintiffs are offering, and you said it was the worst of both
worlds because you would have to crowd in all these BMDs and polling booths or tables for hand-marked paper ballots.

Do you recall that?
A. I believe that is one of the reasons I listed, but not the only reason I listed.
Q. Right. But if you only had one BMD in a polling location, certainly you could arrange booths for hand-marked paper ballots quite simply, couldn't you?
A. If we were to change the method of voting, I would set for that method of voting.
Q. I did not --
A. If we were to change the method of voting, I would set up for that method of voting.
Q. And you would do it quickly and efficiently, wouldn't you?
A. I -- what is the time frame of that? Do you mean like during the day if there is an emergency, if it was ordered, if the legislature changed? Like how -- what are we talking about?
Q. Let's pick if it was ordered.
A. Okay. Well, I would have to procure more voting booths because I only have enough for provisional balloting right now. Otherwise, I would be using the privacy panels I already have on tables.

COURT REPORTER: I'm sorry?
THE WITNESS: Sorry. Otherwise I would be using the
privacy panels -- the blue panels I already have on tables.
And I have not thought through all the things I would need to make that happen, but it would be an undertaking, and I would do it as efficiently as possible.

But I can't list off everything right now that I would have to do.

BY MR. BROWN:
Q. Sir, you referenced Dr. Ben Adida?
A. Did I?
Q. From Arlo.

MR. MILLER: Your Honor, I don't think Dr. Adida was
discussed at all.
COURT REPORTER: I'm sorry?
BY MR. BROWN:
Q. Are you familiar with Dr. Adida?

COURT REPORTER: I'm sorry. I didn't get his objection at all. I couldn't hear it.

MR. MILLER: I was objecting to that. I think
Mr. Brown is rephrasing, but I don't think we discussed Dr. Adida at all. We did discuss Arlo.

THE COURT: You discussed the -- you discussed matters relating to his participation in the -- in the RLA audits designed by --

MR. MILLER: Sure. I was correcting the question because Mr. Brown said, do you remember discussing Dr. Adida?

He rephrased it, which is fine.
MR. BROWN: I'll withdraw that question. I just got
that wrong.
BY MR. BROWN:
Q. You testified about the Arlo audit application.

Do you recall that?
A. Yes.
Q. Are you familiar with Dr. Adida who runs that company?
A. I am.
Q. And do you have a respect for his opinions about auditing and about equipment configurations?
A. I believe that could depend on the opinion.
Q. Well, did you know that he recommends to 99 percent of his customers that they use in their polling locations one BMD for accessibility and the rest hand-marked paper ballots? Did you know that?
A. I do not.

MR. MILLER: Objection, Your Honor, to the extent it is not in evidence. If we're agreeing the Tweet is now in evidence -- I don't recall him testifying about this, but --

MS. KAISER: He testified to it.
MR. BROWN: Your Honor, he said that maybe half a dozen times, maybe more.

THE COURT: I think he did say it. I mean, I'm not sure it is that helpful, but -- in terms of the use of time and
where we're at, but you can ask him.
MR. BROWN: Your Honor, I get the hint and have no further questions. Thank you.

THE COURT: Mr. Oles is very efficient.
MR. OLES: I'm going to try and continue to be. CROSS-EXAMINATION

BY MR. OLES:
Q. Good afternoon, Mr. Kirk. My name is David Oles, and I represent one of the plaintiffs, Ricardo Davis, in this -- in this suit here.
A. It's nice to meet you.
Q. Nice to meet you too.

I have a couple of questions for you concerning your experience with election systems and your current position.

Would you agree with me, in your extensive experience, that an election process should provide confidence to voters that their vote is accurately recorded?
A. I would go beyond that and say it should provide confidence to the voters in the entire process.

COURT REPORTER: I need you to repeat.
THE WITNESS: Sorry. I would go beyond that and say it should provide confidence to the voters in the entire process.

BY MR. OLES:
Q. Now, in its -- and you are familiar with -- obviously,
with the Dominion system that Georgia currently uses; correct?
A. I am.
Q. Okay. In its current configuration system, the Dominion ballot-marking device prints a paper ballot with a $Q R$ code; is that correct?
A. That is correct.
Q. Okay. And would you agree with me that it is not possible for a voter to read Dominion's proprietary $Q R$ code that actually contains the ballot selections?
A. Yes. But I would go further to say that no matter how a ballot is marked, whatever kind of pen you use, whether it is a BMD or a pen bubbling in an oval, the voter has no way of telling where -- how the tabulation happens because in both cases that is coding.
Q. Okay. Thank you.

But here is my question: As a result of the $Q R$ code holding the encoded information, even if, as you suggest, the voter reviews the paper ballot and the text that is printed on it, the voter has no way of ensuring that its vote -- that their vote that they feed into the scanner is what they actually picked on the screen?
A. I -- going back to the point I just made, whether you mark a ballot with a machine or you mark it by bubbling in an oval, the voter has no way of knowing how that ballot is being tabulated.

The scanner for hand-marked ballot does not look at the theme. It looks at the coordinates of the bubble. If you swap names -- so in both cases, they have no way of knowing.
Q. Now, you testified that you audit, I think you said, 100 percent of elections?
A. I audit one race in every election $I$ conduct currently.
Q. Okay.
A. I'm looking at ways to expand that.
Q. Now, would you agree with me that risk-limiting audits depend upon printed ballots? That is, they look at the printed ballots in order to perform the audit?
A. The -- yes. Any kind of tabulation audit should look at what the voter looks at, not what the machine looks at.
Q. So as a result of the ballot-marking device being in this -- in this mix here, would you agree with me that any risk-limiting audit, even if you audited 100 percent of the races, cannot verify the choices displayed to the voter as accurate?
A. Absolutely not.
Q. So let me make sure $I$ understand.

When the voter walks into the -- when the voter takes their card and walks in front of that ballot-marking device, you're telling me that there is some way that that voter can tell that what is displayed on the screen is accurate for them?
A. What would they be checking for accuracy? You mean what

```
races are displayed?
```

Q. Yes.
A. Well, if they know what races they are entitled to vote on, then yes, they can look at the screen and see those races on the screen.
Q. In your experience with -- you have been doing this for how many years?
A. I have been in elections since 2002.
Q. In your experience with this, how many voters actually come in and know all the races that they are supposed to see on the screen?
A. I'm not sure.
Q. Okay. In reality, it is a small fraction, if at all; right?
A. I have never taken a poll to know how many voters know what districts they are in on their way in the door.
Q. And you would further agree that a risk-limiting audit cannot verify if the selection made by the voter on the screen was properly recorded?

And I think you just already agreed with that.
A. No, I didn't.
Q. Okay. Let me pose it to you again then.

Would you further agree that a risk-limiting audit cannot verify if the selection made by the voter on the screen was properly recorded as his or her vote by the system?
A. Oh, you're saying if a voter didn't verify their ballot at all how would we know that was their selection?
Q. I'm saying even if they did look at it, you can't guarantee -- the voter can't be sure with the current system that what is recorded in the system was what they picked?
A. To back up a little bit then, we ask the voters -- we make sure the voters verify their selections prior to casting their ballot. Once that ballot goes into the machine and enters into a locked sealed box, it is transferred once under public scrutiny, if there are poll watchers there, into a separate sealed container where it sits until the audit.

And during my audit, we will look at what the voter looked at and compare the results of us looking at the voters' selections that they verified to the results reported by the voting system.

So yes, I can verify that what they verified and what they cast matches the results that were reported.
Q. But you're just looking at that paper ballot; right?

And what the scanner counts -- and you just said yourself what it is counted is what was on the $Q R$ code. There is no way that in a risk-limiting audit -- several experts have come up here in this case and testified that there is absolutely no way that a risk-limiting audit with a BMD in the center can produce an accurate and reliable audit.

Are you disagreeing with them?

THE WITNESS: Before I answer, do you want to say
something?
MR. MILLER: Your Honor, I'll just state an objection as to I think he's asked and answered this question a couple of different times. And we're veering, again, outside the scope of direct.

We talked about what he conducts. Not some expert opinion on risk-limiting audits.

THE COURT: Could you just read me the witness' answer?
(There was a brief pause in the proceedings.)
THE WITNESS: If I may, maybe this will clarify.
THE COURT: Go ahead.
THE WITNESS: No matter what kind of ballot is cast, whether it is hand-marked, whether it is a ballot from a BMD that contains a different coding than the hand-marked paper ballot does, what we need for the audit is the text the voter verified.

We compare that overall vote total to the total reported by the system. I am not sure how that comparison wouldn't show a discrepancy between what the voter verified and what the system reported.

BY MR. OLES:
Q. What we're talking about is what the voter picked when they walked into -- in front of that BMD.
A. Let me rephrase then.

Then what the voter picked and looked at is what I'm looking at during the audit, and I compare that to the results reported by the voting system to ensure that they match or match with a very small margin of error.
Q. You already agreed with me, I believe, that the scanner reads the QR code?
A. Right.
Q. And the voter could not verify what is in the $Q R$ code; right?
A. Right.
Q. So there is no way that your audit can verify that what the voter picked is what made it to the other end?
A. What it verifies is the results reported by the voting system.

THE COURT: Go slow. Go slow.
THE WITNESS: What it verifies is the results reported by the voting system, so what it read from the code or from the bubbles, matches a hand tally of what the voter looked at.

BY MR. OLES:
Q. Do you understand how the ballot works?
A. Do you?
Q. No.
A. Yes, I do.
Q. I get to ask questions here.

Because you're telling me -- and I think -- I want to make sure $I$ get this right.

You are telling me that you can take that ballot as it was scanned and guarantee that what the voter entered at the BMD is in there?
A. I can -- I'm trying to think of a different way to say this.

What I look at during my audit is what the voter verified, the name on the ballot, the selection in a contest yes or no. And we count those voter verifiable selections, and we compare that to the overall vote total reported by the system.

So do I compare the results of every individual ballot? No.

Do I compare the aggregate totals for each batch that I'm auditing. Absolutely. And they have always matched. Q. Okay.

MR. MILLER: Your Honor, at this point, not only is it beyond direct, which I objected to before and was overruled on, but it is also now cumulative.

It is going back to the same verifiability line of questioning that $I$ was overruled on and allowed to go forward in the earlier cross-examination.

THE COURT: I think that -- I think that you've done probably as much as you can do at this point.

MR. OLES: I'm moving on, Judge. Thank you.
THE COURT: Well -- all right. To a new topic that is within the scope of his examination?

MR. OLES: Yes, Judge.
BY MR. OLES:
Q. Mr. Kirk, would you agree with me that only a small
fraction of people -- of voters ever review the paper ballot that is printed out before they feed it into the scanner?

MR. MILLER: Your Honor, I think the testimony
elicited on the first cross-examination was that he had not conducted a poll of that sort.

THE COURT: All right. That is what he --
MR. OLES: I'll move on, Judge.
THE COURT: -- responded to. Move on.
BY MR. OLES:
Q. Now, Mr. Kirk, you were asked a couple of questions about using hand-marked paper ballots.

I believe in last year -- in August of last year in Cherokee County -- which is right next door to Bartow County; correct?
A. Uh-huh (affirmative).
Q. -- that VOTER GA conducted a hand-count demonstration and timing study.

Did you attend?
A. I did not.
Q. Okay. Just one more thing.

Now, last year, you opposed a number of election integrity
legislation efforts, didn't you?
A. I opposed bills last year. I would disagree with the characterization of election integrity.
Q. So there was a bill -- I believe there were two bills that would have made ballots subject to open records requests. THE COURT: All right. I think that is really outside the scope of the direct, totally outside, so -MR. OLES: I'm done, Judge. THE COURT: Thank you very much. MR. MILLER: Your Honor, I have one question. THE COURT: Sure.

REDIRECT EXAMINATION
BY MR. MILLER:
Q. Mr. Kirk, you testified on the first cross-examination about a lack of qualified election officials and difficulty hiring more following the 20 -- after 2020.

Do you recall that?
A. I do.
Q. Do you have an understanding of why that is?
A. Again, I've never taken a poll of people. But the groups I work with that publish reports about less people coming into elections, part of that is because of the pay, part is because of the atmosphere.

What used to be a very fun job in a lot of cases has become, well, frankly, not as fun as it used to be. There is a lot of accusations coming at us without a lot of data to back them up, and it is wearing on us.

MR. MILLER: Thank you again for your time.
THE WITNESS: Thank you.
THE COURT: So I think this is a very brief question.
I certainly hope so.
THE WITNESS: I'll do my best. EXAMINATION

BY THE COURT:
Q. You talked earlier about that you audited, I guess, one -you did a complete audit of the -- at least for one position in each of your audits that you conducted countywide --
A. Uh-huh (affirmative).
Q. -- as opposed to the two batches that were identified for your auditing by the State; is that --
A. That's correct.
Q. All right. And I'm just -- do you have any understanding of how the batches were drawn up as compared to your -- what you did on the statewide?

I mean, just put that aside. I just wanted to clarify.
A. Meaning how Arlo selects the batches?
Q. Right. Do you have any notion of that yourself?
A. I have a general understanding that it involves a random
algorithm and the sort of math that goes into an RLA of how many batches to select.

I have never seen the code. I know it is open source. I have never looked at it to see how it actually does it.
Q. And your county is approximately about 11 percent -- has a population that is about 11 percent African-American and 5 Hispanic.

I don't know if that is still true.
A. I am not sure.
Q. But is it something in that range?
A. That sounds right.
Q. I mean, I'm not trying to zone in on whether it is precisely right. It is really a question about the sampling.

Do you yourself know whether, in fact, the sampling done ensures that there is a wide range of the population by demographics, whether it could be rural or --
A. This is speculation. But the only data that $I$ know of that Arlo takes in is the ballot manifest.
Q. The ballot manifest is defined as what?
A. It is a listing of all the ballot containers, the batches, and what type of ballots they are, how many are in them.

So, for example, if there's 200 ballots scanned in an advanced voting location over the entire course of voting, that batch size would be 200 and on the ballot manifest it would say the advanced voting location name, the scanner name or scanner
serial number or some identifier for the scanner, and how many
ballots were in that batch.

THE COURT: Thank you.
THE WITNESS: Thank you.
THE COURT: All right. Well, thank you for coming again, and --

THE WITNESS: Thank you for having me.
THE COURT: -- do you need any water for on your way
out?
THE WITNESS: No, but I do appreciate the hospitality.

THE COURT: All right. Good luck with the 2024
election too.
THE WITNESS: Thank you very much.
THE COURT: I know it is a lot of hard work.
THE WITNESS: It is going to be a fun year.
THE COURT: May the witness be excused?
MR. MILLER: Yes.
MR. BROWN: Yes, Your Honor.
THE COURT: Please don't discuss your testimony with
anyone until the case is through, though. I appreciate that.
THE WITNESS: Absolutely.
MR. TYSON: So, Your Honor, at this point our plan -and we had discussed calling Mr. Davis to testify briefly. Given that it is 4:45 on Friday and I know we still have
another matter to discuss, I want to apologize to Mr. Davis. I think he's been here ready for that.

But I will take your direction on the best path to proceed.

THE COURT: And, Mr. Davis, can you be here on Monday morning, or do you have a work conflict?

MR. DAVIS: Let me check.
THE COURT: We can find a time, no matter what.

MR. TYSON: Certainly, Your Honor.
THE COURT: So just identify when you are going to be available before you leave so that everyone can take that into account.

MR. DAVIS: All right. Thank you.
THE COURT: All right. So we're going to end the public session. We had some matters to deal with some of the lawyers. And if you can -- just so they know who is coming first on Monday, if you could just look right now about Monday morning. If you're not available, then just indicate to your counsel and he can write to opposing counsel.

MR. TYSON: And, Your Honor, our only limitation on Monday is Dr. Gilbert needs to conclude his testimony on Monday.

THE COURT: So do you want to start with Dr. Gilbert?
MR. TYSON: Ideally, we would start with Dr. Gilbert, but I don't think Mr. Davis would take that long, though, if he
needed to go first.
THE COURT: Well, he can go after -- just please let
us know your schedule for Monday and Tuesday. I gather it won't take long. But if you email your counsel, he can email the State's counsel.

MR. TYSON: And, Your Honor, last housekeeping item for us before we conclude the public session. I understand that we have had some initial discussions about closings, and I think we're going to have some conversations about that.

But my understanding is -- we wanted to make sure if you had thoughts about that that you wanted us to consider. Otherwise, we can discuss that among ourselves and get back to you.

THE COURT: Well, why don't you first discuss it among yourselves, and then I'll give you some feedback at that point.

MR. CROSS: We had some initial discussions -- I think if the agreement still stands, I think we both thought it would be valuable for the Court.

Getting your thoughts today would be helpful because the weekend would be the best opportunity for us to --

THE COURT: Well, do you have any idea of when the case might close since we've done so unbrilliantly about our scheduling and how long everything takes?

MR. BELINFANTE: Your Honor, I will tell you what we
shared with plaintiffs' counsel at one of the last breaks, which is, our intent is to call Mr. Davis, Dr. Gilbert, Ms. Marks, and Gabriel Sterling.

Depending -- if it were limited to direct, I think we could do that on Monday, but I have no confidence that that's --

THE COURT: No. I think that is at least a two-day adventure.

MR. BELINFANTE: I think you're right, Your Honor. I think you're right.

And one of the things we discussed is providing for at the close of testimony some time -- and I was thinking a day, but depending on when it closes -- for counsel to be able to prepare -- because I'm sure we're all going to use some level of PowerPoint -- a closing argument that contains numerous citations to the record and the transcript.

Obviously, we have been and continue to do so -- but I think those last witnesses are going to involve a fair amount of important material.

But I also understand and raised with opposing counsel many of them are flying in and don't want to increase the burden on that.

So that is the kind of issue we're looking at is, one, would there be any time between the close of the State's case -- obviously, they don't know if they are going to do
rebuttal yet. So that weighs in some. And then the closing and also just how much time the Court wants to afford to closing argument in the case.

MR. CROSS: I think our thoughts are, Your Honor, we don't want to take any time unless Your Honor finds it valuable. We will be ready to stand up when the last witness sits down.

I think right now we're not thinking that we're going to need much of a rebuttal, maybe not any live rebuttal. There may be some additional deposition testimony would come in as designations or something. But I think right now we're not thinking any live witnesses on rebuttal. But we haven't heard, obviously, from Dr. Gilbert. That might affect it.

So our thought was if we can get through the witnesses Monday, maybe even Tuesday morning, I'm fine starting doing closings on Wednesday if that works for the Court, even if we end early on Tuesday. But, otherwise, we just want to move right into it.

THE COURT: Well, I'm just doubtful you're going to be through before the end of Tuesday, and so, you know, either Wednesday or Thursday seemed a little more realistic. And I think some of this has to do with are you wanting to submit proposed findings of fact and conclusions of law or not also.

And without knowing whether that is something you want to do, it is hard for me to answer your question.

```
MR. CROSS: My initial instinct is we probably may want to do that. I think we need to think more about it. But I think whether we do or not, I think the closings, just given the length of the trial and complexity, like the openings, I think will provide a distillation for the Court from both sides that will be helpful, particularly if there are presentations that kind of bring some of the evidence together.
And then if there are findings of fact and conclusions of law, we can get those quickly and you would have all of that together. But we would like to get closings done by Wednesday, if at all possible.
THE COURT: All right. I'm going to say we can do it on Wednesday afternoon, but I'm not somebody who has a lot of confidence in this timeline. And maybe it is my fault because I let everyone go on and present their case or their defense or whatever, but -- and I haven't timed anyone, generally speaking, so -- but, you know, are you thinking an hour for each side?
MR. CROSS: I think sort of our initial instinct was maybe something more like 90 minutes or two hours. We also have multiple folks that have to coordinate. I think the openings we did an hour. Obviously, there's sort of a lot more.
THE COURT: Are you talking about 90 minutes for each set of counsel?
```

MR. CROSS: For a side. So for us --
MR. BROWN: So three hours total.
MR. CROSS: For our side. That's what I thought.
MR. MILLER: 90 minutes for them, 90 for us.
MR. CROSS: Yeah, something like that.
THE COURT: Well, 90 minutes I could tolerate. I
think two hours per side is -- it is hard to listen to that much when you've been listening a lot.

So either we're making progress and we can do that on
Wednesday afternoon and give everyone enough breathing space on
Wednesday morning that you're really ready and you're
functional and I'm functional because you do have to think about -- I mean, I have paid a lot of attention, but it is a lot to hear this much testimony and then to listen to argument right on the heels of it.

So if we are still going on Wednesday morning, no, I'm not going to -- we'll have to do it Thursday.

MR. CROSS: Okay.
THE COURT: I'm just not prepared to roll into three hours of intense argument where I might extend something because of my questions. I would rather just be through.

So I guess that's the best feedback I can give to you, and obviously --

MR. CROSS: That's very helpful.
THE COURT: -- we'll see.

MR. OLES: Judge, I have one question, if I may.
THE COURT: Yes.
MR. OLES: My client was considering offering a brief
rebuttal witness.
Is that something that we can --
THE COURT: Well, they might do the same, for all I
know, so you can do a rebuttal witness.
MR. OLES: Thank you.
THE COURT: Have you identified the rebuttal witness?
I mean --
MR. OLES: Yes. On -- are you talking about --
THE COURT: I mean, have you advised both opposing
counsel that --
MR. OLES: I had intended to do that.
THE COURT: So we have to know -- I mean, they might object. But, anyway, theoretically, you can do that. Whether they object and I have to -- and it raises a whole other set of issues, that is another matter.

MR. OLES: I will take that up, Judge. Thank you.
THE COURT: And I know your folks have been staying up to speed with Mr. Martin.

But, Harry, when are you -- on the documents, when are you leaving?

COURTROOM DEPUTY CLERK: Thursday.
THE COURT: Thursday. So no matter what, you need to

```
not postpone -- for sanity's sake, you have to get all the
documents straight on Wednesday, no matter what. I know you've
been doing it every day, but --
Okay. We're going to adjourn the public hearing right now. And those dealing with this other matter can stay.
                    Let's take five minutes. I will say that I don't --
be concise. All right already? We're going to take five.
            COURTROOM SECURITY OFFICER: All rise. Court stands
    in recess.
                                    (The public proceedings were thereby adjourned
                                    at 4:53 PM.)
```
